

# SPECIALTY SPECIFIC BUNDLES

To better support the transition into residency, VTCSOM has developed thoughtfully curated, specialty-specific bundled electives designed to help you shape a purposeful and cohesive Phase 3. These guided elective pathways allow students to deepen relevant clinical skills, strengthen their preparedness for their chosen field, and make the most of the Phase 3 experience at VTCSOM. They have been vetted with specialists in the field, including Carilion residency and clerkship directors, and national society recommendations (as available).
