

Power to Heal at The Grandin

In observance of Black History Month, employees and students from Carilion, VTCSOM and RUC are invited to the showing of *Power to Heal* at The Grandin Theatre.

This hour-long documentary tells a poignant chapter in history about the struggle for equal and adequate access to health care for all Americans.

Physicians, civil rights leaders and historians recall dramatic incidents and desperate conditions of black families as they share the story of how starting Medicare helped to desegregate hospitals across the country in just a few months.

A Q&A session will follow the documentary.

The first 75 people through the door receive a free popcorn and drink!
