Virginia Tech
Mission Statement
Inspired by our land-grant identity and guided by our motto, *Ut Prosim* (That I May Serve), Virginia Tech is an inclusive community of knowledge, discovery, and creativity dedicated to improving the quality of life and the human condition within the Commonwealth of Virginia and throughout the world.
2019 Mission Statement adopted by the Board of Visitors

Virginia Tech Carilion School of Medicine
Mission
To develop physician thought leaders through inquiry, research, and discovery, using an innovative curriculum based upon adult learning methods in a patient-centered context. Our graduates are physicians with outstanding clinical skills and significantly enhanced research capabilities who will remain life-long learners. They have an understanding of the importance of interprofessionalism to enable them to more effectively function as part of a modern health care team.

Accreditation Statement
Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
Virginia Polytechnic Institute and State University (Virginia Tech) is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate, baccalaureate, masters and doctorate degrees. Questions about the accreditation of Virginia Tech may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC’s website (www.sacscoc.org).

9060. Orientation to Medical School and to VTCSOM (1 credit):
Topics for this course include:
Patient-Centered Learning Case Process, Introduction to the Curriculum and Value Domains, VTCSOM Student Policies and Procedures, Introduction to Student Services, Introduction to Student Health, and Well-Being
Prerequisite(s): None
Co-requisite(s): None

9080. Integrated Foundational Sciences 1 (16 credits):
Introduction to patient-centered interview and generating problem list; oral, written, and physical exam skills for vital signs, HEENOT, neck, dermatological, and abdominal examination; Application of clinical reasoning and diagnosis; Foundational skills related to clinical imaging and corresponding anatomy; Interpretation of diagnostic test; core concepts in basic science related to immunology, microbiology, dermatology, endocrine and gastrointestinal systems and associated therapeutics.
Prerequisite(s): None
Co-requisite(s): None

9081. Integrated Foundational Sciences 2 (16 credits):
Introduction to motivational and triadic patient-centered interview; oral, written, and physical exam skills for cardiovascular, pulmonary, musculoskeletal, and neurological exams; application of clinical reasoning and diagnosis; skills related to clinical imaging of chest, heart, lung, and musculoskeletal system and corresponding anatomy; interpretation of diagnostic tests including EKG; core concepts in basic science related to cardiovascular, pulmonary, renal, musculoskeletal, and nervous systems and associated therapeutics.
Prerequisite(s): None
Co-requisite(s): None

9083. Research and Inquiry 1 (2 credits):
This course is designed for learners to identify elements of the scientific method and key concepts of human and animal research and inquiry necessary to practice evidence-based medicine. Skills related to the responsible code of conduct and ethical human and animal research topics will be explored. Learners design research questions and use these skills in epidemiological design. Lab/studio.
Prerequisite(s): None
Co-requisite(s): None
9084. Research and Inquiry 2 (2 credits):
Theory and application of the key concepts and elements of human and animal research and inquiry, emphasizing the scientific method through the formulation and detailed study of biomedical research questions. Application of biostatistics concepts to human and animal research. Communication of a proposed original research study to a diverse audience. (Lab/studio)
Prerequisite(s): None
Co-requisite(s): None

9086. Health Systems Science and Interprofessional Practice 1 (2 credits):
Introduction to health systems science and interprofessional practice; application of systems thinking to healthcare; introduction to and application of social and structural determinants of health; application of sources of data and their limitations with respect to population health; health inequity; introduction to healthcare structure and process; health promotion and disease prevention; introduction to patient safety and quality improvement; application of teamwork and communication to healthcare delivery and change agency. Lab/Studio.
Prerequisite(s): None
Co-requisite(s): None

9087. Health Systems Science and Interprofessional Practice 2 (2 credits):
Core concepts in health systems science and interprofessional practice; professionalism lapses in medical practice; health law and ethical principles in medical practice; patient safety, risk reduction, and quality improvement; introduction to root cause analysis; application of systems thinking to healthcare; application of teamwork and communication to healthcare delivery and change agency. (Lab/Studio)
Prerequisite(s): None
Co-requisite(s): None

9090. Topics in Professions of Medicine (2 credits):
This course is designed to develop a systems thinking mindset and research and inquiry to inform clinical practice. Learners will identify leadership qualities needed for professional adaptation. The course will use reflective practice for professional growth and growth and development; and implementation of learning plans for professional growth. Learners are expected to demonstrate conscientious behaviors consistent with the medical profession. The course may be repeated 3 times with different content for a maximum of 8 credit hours. Lab/Studio.
Prerequisite(s): None
Co-requisite(s): None

9091. Topics in Community and Clinical Immersion (1 credit):
Early clinical and community exposure to address approaches to patients, stakeholders, and teams in various settings, review healthcare inequities, and how this impacts the healthcare delivery system. Patient safety concepts, population, and community health needs and inequities will be explored; immersive exposure and guided analysis of leadership, teaming, healthcare change agency, and healthcare communication strategies with patients and within healthcare systems.
Prerequisite(s): None
Co-requisite(s): None

9M1R. Research (3 credits):
Once the student has proposed a research project at the end of Semester 2, students are guided in their project by a research mentor and a small committee of basic and clinical scientists who provide regular feedback to the students on their progress. During the M1 research course, students will complete three weeks of independent research on their chosen project.
Prerequisite(s): 9080-9091
Co-requisite(s): None

</tr>
</tbody>
</table>

Topics for this course include:

**Fundamentals of Pathobiology:** Cells and Tissues, Necrosis, Neoplasia, Inflammation, Genetic Disorders, Immunological Diseases, Infection, Microbiology, Virology, Skin Disorders, Pharmacology, and Therapeutics

**Interviewing and Physical Exam V:** Clinical Skills Review (Complete History and Physical Exam); Detailed Family and Genetic History; Dermatology Exam; Ultrasound; Fundamentals of Case Presentation I; Clerkship Competency Series: Gown and Glove, Health Promotion and Disease Prevention; Adult Immunizations; and Longitudinal Ambulatory Care Experience (LACE)

**Research:** Individual Student Research Project

**Health Systems Science and Interprofessional Practice—Community Health:** Community Health Assessment and Community Health Improvement; Community Lessons in Leadership and Change Agency; and Health Care Policy in the United States

Prerequisite(s): 9080-9091 + 9M1R
Co-requisite(s): None

Topics for this course include:

**Pathobiology of the Human Body I:** Hematology, Bleeding Disorders, White Cell Disorders, Vascular Diseases, Heart, Pulmonary, Ear, Nose and Throat (ENT), Lymph Nodes and Spleen, Microbiology, Virology, Pharmacology, and Therapeutics

**Interviewing and Physical Exam VI:** Assessing Stages of Change: Smoking Cessation, Exam Findings in Cardiopulmonary Disease, Electrocardiogram (ECG) and Chest X-ray Interpretation; Clerkship Competency Series: ABGs, Venous Blood Draws, and Oxygen Therapy; and Longitudinal Ambulatory Care Experience (LACE)

**Research:** Individual Student Research Project

**Health Systems Science and Interprofessional Practice—Health Care Systems and Health Policy:** Community Lessons in Leadership and Change Agency; Group Presentations on Community Health Improvement; and Comparative Health Care Systems

Prerequisite(s): 9071
Co-requisite(s): None
Topics for this course include:

**Pathobiology of the Human Body II:** Gastroenterology (GI) Tract, Liver, Pancreas, Renal, Male and Female Genitourinary (GU), Breast, Microbiology, Virology, Pharmacology, and Therapeutics

**Interviewing and Physical Exam VII:** Fundamentals of Case Presentation II; Interview Skills: Nutrition and Supplement History, OB and Sexual History; Review: Breast Exam, GU Exams, Exam Findings in GI and Renal, History and Physical, and Psychosocial Aspects of GI, Renal, and Urogenital Diseases including Ultrasound Findings, Abnormal Breast Exam; Clerkship Competency Series: Nasogastric (NG) Tube, Foley Catheter; and Longitudinal Ambulatory Care Experience (LACE)

**Research:** Individual Student Research Project

**Health Systems Science and Interprofessional Practice—Policy in Practice:** Guidelines; Value-Based Care and ACOs; Health Insurance and Documentation; Quality Improvement; and Patient Safety

*Prerequisite(s):* 9071-9072
*Co-requisite(s):* None

9074. Block VIII: Pathobiology of the Human Body III, Interviewing and Physical Exam VIII, Research, and Experience and Assessment of Quality and Leadership in Interprofessional Health Care Teams (8 credits):
Topics for this course include:

**Pathobiology of the Human Body III:** Oral Medicine, Endocrine, Skeletal and Soft Tissues, Musculoskeletal, Environmental and Nutritional Diseases, and Central and Peripheral Nervous Systems

**Interviewing and Physical Exam VIII:** History and Physical and Psychosocial Aspects of Neuromuscular Diseases; Clinical Psychiatric Syndromes and their Underlying Neurobiological Dysfunctions; Exam Findings in HEENT and Dental Diseases; Endocrine Cases including Thyroid Ultrasound; Review Pediatric Development; Clerkship Competency Series: Suturing and Wound Care; and Longitudinal Ambulatory Care Experience (LACE)

**Research:** Individual Student Research Project

**Health Systems Science and Interprofessional Practice—Experience and Assessment of Quality and Leadership in Interprofessional Health Care Teams:** Communication, On-Site Nurse Shadowing, High-Fidelity Simulation Scenario, and Caring for Complex Patients

*Prerequisite(s):* 9071-9073
*Co-requisite(s):* None

9M2IS. Independent Study (6 credits):
Students will complete three weeks of USMLE Step 1 preparation.

*Prerequisite(s):* 9071-9074
*Co-requisite(s):* None

9M2R. Research (6 credits):
Students will complete six weeks of independent research.

*Prerequisite(s):* 9071-9074 + 9M2IS
*Co-requisite(s):* None
PHASE I / Longitudinal Student Electives

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Transcripted Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>9LSE</td>
<td>Longitudinal Student Elective</td>
</tr>
</tbody>
</table>

Elective time is available in Years 1 and 2 to take such courses as Foundations for Success in Medical Education, Foundations of Mindfulness Practice, Introduction to Medical Spanish, and Narrative Medicine – The Rest of the Story: Discovering the Person Within the Patient. These courses are offered for elective credit but are not required. Continuous registration is dependent on the student remaining in good academic standing, and the student must remain registered for the longitudinal elective during Blocks I-VII in order to earn two credits at the conclusion of Block VII.

**Foundations for Success in Medical Education (2 credits):**
This longitudinal elective is designed to provide medical learners with knowledge and skills necessary to foster long-term learning throughout their careers from medical school through residency and into the attending level of medicine. The course is built upon evidence-based research and theory in the realm of cognition, study, and personal wellness. Topics include metacognition, memory, cognitive processing strategies, deliberate practice, imposter phenomenon, burnout, nutrition, exercise, sleep, and mindfulness.

*Prerequisite(s): Successful completion of Semester 1
Co-requisite(s): None

**Foundations of Mindfulness Practice (2 credits):**
Mindfulness is the awareness that develops as we pay attention to our present-moment experience with acceptance, curiosity, and nonjudgment. This course will support students in establishing a mindfulness practice through both formal practices and in daily life. Class will be highly experiential, designed to explore mind-body awareness, mindfulness meditation and compassion practices, and mindful communication. The Koru Basic four-week mindfulness curriculum will be completed at the beginning of this longitudinal elective. Contemplative practices will support self-understanding to navigate life stressors with greater clarity, ease, and well-being.

*Prerequisite(s): Successful completion of Semester 1
Co-requisite(s): None

**Introduction to Medical Spanish (2 credits):**
To develop communicative proficiency in medical Spanish and cultural competency for effective interactions with Spanish-speaking patients in a variety of health care settings.

*Prerequisite(s): Successful completion of Semester 1
Co-requisite(s): None

**Narrative Medicine – The Rest of the Story: Discovering the Person Within the Patient (2 credits):**
This narrative medicine course seeks to develop students’ attentive listening skills, empathy, reflectiveness, and narrative competence through extended patient interviews and creative response.

*Prerequisite(s): Successful completion of Semester 1
Co-requisite(s): None

The Virginia Tech Carilion School of Medicine requires clerkship rotations in the following medical specialties and in research in the M3 year:

- Emergency Medicine (4 weeks) - occurs in the M3 or M4 year and has a prerequisite of having completed the Internal Medicine, Surgery, OB-GYN, and Pediatric Clerkships.
- Family Medicine (4 weeks)
- Internal Medicine (6 weeks)
- Neurology (2 weeks)
- Obstetrics and Gynecology (6 weeks)
- Pediatrics (6 weeks)
- Psychiatry (6 weeks)
- Radiology (2 weeks)
- Surgery (6 weeks)
- Research (6 weeks)

9811. Clerkship – Emergency Medicine (4 credits):
This clerkship will occur in the last portion of the third year or during the fourth year. Students will spend the four-week clerkship in the Carilion Roanoke Memorial Hospital Emergency Department working various shifts and learning to rapidly assess a patient and initiate urgent work-ups and treatments.

Prerequisite(s): Successful completion of Phase I, 9812 or 9813, 9815, 9816, 9819 and student must have taken USMLE Step 1 prior to participating in a clerkship. If a student does not successfully pass USMLE Step 1, they may not proceed to the second clerkship in which they are registered without the approval of the MSPPC.

Co-requisite(s): None

Duration: 4 weeks

9812. Clerkship – Family Medicine (4 credits):
The student will work with one of the Roanoke-based Family Medicine practices. During this four-week clerkship, the student will have a wide variety of experiences and be exposed to a myriad of different patients, but should come away with firm knowledge of how to approach all of the different situations from the comprehensive, patient-centered view that characterizes Family Medicine.

Prerequisite(s): Successful completion of Phase I

Co-requisite(s): None

Duration: 4 weeks
9813. Clerkship – Internal Medicine (6 credits):
The third-year clerkship in Internal Medicine will occur at Carilion Roanoke Memorial Hospital. The focus will be on caring for adult hospitalized patients. The clerkship will be spent working with one of the Internal Medicine teaching teams.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 6 weeks

9814. Clerkship – Neurology (2 credits):
The third-year clerkship in Neurology is a two-week experience that will be divided between working with the Carilion Clinic neurologists in the inpatient setting and the neurologists at the Salem VA Medical Center in the outpatient setting. Students will be exposed to a variety of cases and be able to observe the means by which neurologists diagnose and treat diseases of the central and peripheral nervous systems and of skeletal muscle.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 weeks

9815. Clerkship – OB-GYN (6 credits):
During the OB-GYN clerkship, time will be spent on the OB and GYN services with inpatient and outpatient experiences, including a subspecialty GYN service. Students will participate in day and night labor call for OB and spend time in the operating room as part of patient care during their GYN education.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 6 weeks

9816. Clerkship – Pediatrics (6 credits):
The six-week Pediatric clerkship will be divided into two weeks of inpatient pediatrics at Carilion Roanoke Memorial Hospital (CRMH), one week of newborn nursery at CRMH, two weeks of outpatient general pediatrics, and one week of pediatric subspecialties. Through these clinical experiences, the student will get an extensive overview of general pediatrics.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 6 weeks

9817. Clerkship – Psychiatry (6 credits):
The six-week Psychiatry clerkship is designed to continue with the principles of lifelong learning, humanism, inquiry, and professionalism established in the preclinical years. All students participate in the same initial core four-week rotations, based on the Adult Inpatient Psychiatry Units and consultation–liaison service at Carilion Medical Center. Each patient will be followed by a given student from admission to discharge. During two weeks of the clerkship, the student will opt for two separate "selective" rotations of one week each.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 6 weeks
9818. Clerkship – Radiology (2 credits):
The third-year clerkship in Radiology is a two-week experience where students will become familiar with
the commonly used imaging modalities and imaging findings of medical, surgical, and traumatic
conditions. Students will also become familiarized with the concepts and principles of appropriateness
criteria, their incorporation in and evolution from, evidence-based medicine. This will be achieved
through a variety of experiences in the Radiology Department.
*Prerequisite(s): Successful completion of Phase I
*Co-requisite(s): None
*Duration: 2 weeks

9819. Clerkship – Surgery (6 credits):
The focus of this six-week Surgery clerkship is to introduce students to the care of surgical patients,
including initial patient assessment and perioperative management, as well as surgical intervention
itself. This rotation length will allow good continuity with the surgical team and the patients under the
care of the various surgery teams.
*Prerequisite(s): Successful completion of Phase I
*Co-requisite(s): None
*Duration: 6 weeks

9820. Clerkship – Exploring Health Systems Science: Enhancing Problem-Solving and Decision-Making
in Clinical Care (2 credits):
This is a required longitudinal course occurring across specific session dates throughout the clerkship
year. Topics include clinical applications of health systems science, importance of systems thinking in
clinical practice, complex health care topics, and development into a systems citizen.
*Prerequisite(s): Successful completion of Phase I
*Co-requisite(s): None
*Duration: 2 weeks

9M3R. Research (6 credits):
Students will complete six weeks of independent research.
*Prerequisite(s): Successful completion of Phase I
*Co-requisite(s): None
*Duration: 6 weeks

Electives:
For students not doing the Emergency Medicine clerkship during the third year, there are four
weeks of elective time available. These four weeks can be divided into 2 two-week electives or 1
four-week elective. Each two-week experience counts as two credits and each four-week experience
counts as four credits.

9002. Elective - Step 2 Independent Study (2, 4, or 6 credits):
The focus of this elective is to provide structured study time and educational resources for students who
have been required to delay their USMLE Step 2 examination due to not achieving a target practice test
score, or for students who have taken and failed the USMLE Step 2 examination. Students will create a
structured study plan and will work with the senior dean for academic affairs (or designee) in
collaboration with the senior dean for student affairs and appropriate faculty to implement this
independent study plan.
*Prerequisite(s): Successful completion of Phases I and II
*Co-prerequisite(s): None
*Duration: 2, 4, or 6 weeks
**PHASE III**

**Required curricular components:** (12 weeks) and Emergency Medicine (4 weeks) if not completed in Year 3
- ICU Elective – 2 weeks
- Medical Subspecialty Elective – 2 weeks
- Research – 2 weeks
- Surgical Subspecialty Elective – 2 weeks
- Transition to Residency I – 2 weeks
- Transition to Residency II – 2 weeks
  **TOTAL = 12 weeks**
- Emergency Medicine Clerkship – 4 weeks

**Electives:** 18 or 22 weeks depending on whether Emergency Medicine was completed in Year 3

**Vacation:** 8 weeks

**9811. Clerkship – Emergency Medicine (4 credits):**
This clerkship will occur in the last portion of the third year or the first half of the fourth year. Students will spend the four-week clerkship in the Carilion Roanoke Memorial Hospital Emergency Department working various shifts and learning to rapidly assess a patient’s stability and initiate urgent work-ups and treatments.

*Prerequisite(s):* Successful completion of Phase I, 9812 or 9813, 9815, 9816, 9819
*Co-requisite(s):* None
*Duration: 4 weeks*

**9M4R. Research (2 credits):**
Students will complete two weeks of independent research.

*Prerequisite(s):* Successful completion of Phases I and II
*Co-requisite(s):* None
*Duration: 2 weeks*

**9TR1. Transition to Residency I (2 credits):**
This course occurs during the two weeks surrounding the NRMP Match. Students will participate in activities in assessment of the Entrustable Professional Activities (EPAs), will celebrate Match Day, and will present posters, abstracts, and podium presentations of their VTCSOM research projects.

*Prerequisite(s):* Successful completion of Phases I and II
*Duration: 2 weeks*

**9TR2. Transition to Residency II (2 credits):**
This course occurs during the final two weeks in the four-year curriculum. Students will take the ACLS certificate course and attend sessions on various clinical topics, debt repayment and financial aid issues, residency preparation suggestions, and legal issues.

*Prerequisite(s):* Successful completion of Phases I and II
*Duration: 2 weeks*

<td>9B06</td>
<td>Acting Internship in Anatomic and Clinical Pathology Elective</td>
</tr>
</tbody>
</table>

9B01. Elective – Anatomy Prosection (2 credits):
The goal of this elective is to increase the knowledge of students in prosection in specific anatomical areas. Objectives are to identify and prosect an area of anatomic interest, identify one pathological condition associated with the area dissected and describe findings, describe clinical significance of dissected area during the course of a clinical procedure, describe age-related variations in the dissected area, describe how an age-related difference would affect clinical care, and identify normal variations, if any.

*Prerequisite(s): Successful completion of Phases I and II*
*Co-requisite(s): None*
*Duration: 2 weeks*

9B03. Elective – Forensic Pathology (4 credits):
Medical students will be exposed to daily procedures of Forensic Pathology with the expectation that students will learn to determine cause of death based on circumstances surrounding death, past medical history, and pathological diagnoses determined in the course of autopsy examination. Students will learn to properly complete a death certificate and how to testify in court as an expert witness. Students will also learn about the impact of cases on public health and safety.

*Prerequisite(s): Successful completion of Phase I*
*Co-requisite(s): None*
*Duration: 4 weeks*

9B04. Elective – Pathology (2 or 4 credits):
This elective will consist of reviewing gross and microscopic pathology specimens with attending pathologists, attending and participating in multidisciplinary conferences, observing the operation of the clinical and histologic laboratories, participating in autopsy pathology, and correlating pathologic diagnoses with patient management using principles of evidence-based medicine. The medical student will review the patient’s clinical history, physical exam, laboratory data, and radiologic studies and correlate the relevant information with gross and microscopic findings of patient specimens. From this information, the medical student will develop a differential diagnosis, plan the diagnostic evaluation, and relate the final pathologic diagnosis to patient outcome, based on sound anatomic pathology and laboratory medicine principles.

*Prerequisite(s): Successful completion of Phase I + 9813, 9815, 9816, or 9819*
*Co-requisite(s): None*
*Duration: 2 or 4 weeks*
9B05. Elective – Anatomic and Clinical Pathology Elective (2 credits):
Physicians routinely rely on tissue diagnoses and clinical laboratory tests to guide patient care. The student will learn the role of anatomic pathology and clinical laboratory medicine in the multidisciplinary care of patients. This course aims to provide a deeper understanding of tissue testing and clinical laboratory test utilization, and how specimens should be submitted. Specifically, every physician needs to know where laboratory tests are performed, limitations, and what pathologists and other laboratory professionals need in order to provide the most meaningful report results for their patients and how to develop a differential diagnosis. Such needs include sample size, adequacy, quality, fixative, and proper type to fit each specific test, as well as knowing what pertinent information should be provided. In this manner, the medical student will know the importance of proper test utilization for which they ultimately one day may be responsible to interpret in the context of the patient’s clinical history, radiologic studies and physical findings. The medical student will also learn how to best consult pathologists, and other laboratory medicine professionals, and discover an amazing resource for collaborative patient care. System cost savings due to decreased laboratory overutilization and improved interdepartmental communication is the goal.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9B06. Elective – Acting Internship in Anatomic and Clinical Pathology Elective (4 credits):
Physicians routinely rely on tissue and clinical laboratory tests to guide patient care. This course aims to deepen the understanding of tissue testing and clinical laboratory test utilization. The student is expected to analyze gross and microscopic pathology specimens independently, functioning at the level of a sub-intern. Emphasis will be placed on recognition of histological patterns and correlation of this information to the patient’s clinical history, physical examination, laboratory data, and radiologic studies to form working diagnoses for each case. Attendance and participation in autopsy pathology and multidisciplinary conferences will also be required. The student’s hours will match those of the attending with whom they are scheduled to work. The student will be required to observe the duties of an on-call pathologist one weekend during the clerkship. There will be no night duties.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

**9101. Elective – Clinical Decision-Making (2 credits):**
How do we make decisions? What thought processes occur when a physician assimilates multiple pieces of information to arrive at a plan of action, a diagnosis, or a treatment modality? What are sources of error in our thought processes, and how can we learn to overcome them to be more effective decision makers? This two-week elective will consist of several readings, discussions, and direct observation of physician decision-making in the Emergency Department setting. The location is Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phase I*

*Co-requisite(s): None*

*Duration: 2 weeks*

**9102. Elective – Emergency Ultrasound (2 credits):**
This two-week elective will consist of learning to perform basic limited point-of-care ultrasound examinations on patients who are in the Emergency Department at Carilion Roanoke Memorial Hospital. The medical student will perform bedside ultrasounds under supervision and create a portfolio of studies and interesting cases that were performed. From these studies, the medical student will develop an understanding of ultrasound physics, learn standard ED scan protocols, and learn to interpret positive and negative findings in real time. The location is Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-requisite(s): None*

*Duration: 2 weeks*

**9103. Elective – Pre-Hospital Medicine (2 credits):**
This elective will consist of didactics and observational ride-along shifts with EMS units in the Roanoke area. The medical student will receive education in the principles of pre-hospital medicine, including capabilities, limitations, skill levels, and costs associated with pre-hospital transportation methods. Over the course of two weeks, the student will receive several hours of didactic education as well as participate in 8-10 shifts with EMS and fire units in multiple locations. The locations are Carilion Roanoke Memorial Hospital and area EMS services.

*Prerequisite(s): Successful completion of Phase I*

*Co-requisite(s): None*

*Duration: 2 weeks*
9104. Elective – Pediatric Emergency Medicine (2 or 4 credits):
This elective will consist of shifts in the Pediatric Emergency Department at Carilion Roanoke Memorial Hospital. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the medical student will develop a differential diagnosis, plan the diagnostic evaluation, and design the acute management of the patient. The medical student will then observe and/or participate in the medical care and procedures that make up the patient’s management plan. Emphasis will be placed on age-appropriate exam techniques and treatment modalities for acutely-ill and injured children. This elective is meant to be an intensive clinical experience in Pediatric Emergency Medicine.

Prerequisite(s): Successful completion of Phase I + 9812 or 9813, 9815, 9816, 9819
Co-requisite(s): None
Duration: 2 or 4 weeks

9105. Elective – Acting Internship in Emergency Medicine (4 credits):
The four-week Acting Internship (AI) in Emergency Medicine elective is meant to complement an EM clerkship. While it is not required, it is recommended that students have had a prior clerkship experience to gain the baseline fund of knowledge. The AI is meant to serve as a month-long “interview” rotation, and therefore students are expected to have an interest in pursuing a career in Emergency Medicine with Carilion Roanoke Memorial Hospital as a possible residency destination. Students will work a schedule similar to that of an intern in our Emergency Medicine residency in the ED at CRMH. Students will be responsible for initial patient assessment, presentation to attending physicians, as well as developing independent management plans. Focus will be on multitasking skills and development of plans of care appropriate for the student’s educational level. Opportunities will exist for students to gain extra exposure to an area of interest (ultrasound, pre-hospital, tactical, wilderness medicine, academic/educational development), and students are encouraged to contact us ahead of time to allow time to arrange these experiences.

Prerequisite(s): Successful completion of Phases I and II + 9811
Co-requisite(s): None
Duration: 4 weeks

9106. Elective – Wilderness Medicine (2 credits):
This elective will be an immersive experience in wilderness medicine. Over the course of the two weeks, students will develop the skills and knowledge necessary to practice medicine in an austere environment. They will also learn the skills necessary to survive in such environments and the means by which they can bring patients to definitive care. Their experience will include small group learning, hands-on work stations, and immersive trips to the outdoors.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9107. Elective – Introduction to Emergency Medicine (2 credits):
The Emergency Department is a unique environment in the hospital because unselected patients with undifferentiated chief complaints arrive with no appointment. Physicians need to rapidly triage, stabilize, rule in and rule out diagnoses, and determine appropriate destination for further work-up or definitive treatment. This elective is designed for the student who is interested in emergency medicine as a career and needs earlier exposure to this field. For example, the student has changed career choice and did not complete EM clerkship in M3 year. Acceptance to the elective is based on application directly to the emergency medicine clerkship director.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks
9108. Elective – Evidence-Based Medicine (2 credits):
Why did we order that test? What is the evidence for ordering a CBC on a patient with belly pain? Why would you reflexively order a CT scan on a patient older than 65 with new onset abdominal pain? These questions and many others will be answered as you search for the primary literature for support of medical decisions made in the Emergency Department. This two-week elective will consist of several readings, discussions, and direct observation of physician decision-making in the Emergency Department setting.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): none
Duration: 2 weeks

9109. Elective – Rural Emergency Medicine (2 credits):
This elective will introduce the medical student to a more rural population of individuals with a wide variety of Emergency Department presentations. The student will become familiar with a different hospital system in this more rural setting. It will be expected that the medical student will further develop their skills of history taking, physical examination, critical thinking, and knowledge of emergency room medicine, including pharmacology, while becoming competent and confident in the diagnosis and management of these issues. This elective is to assist the student in understanding the type of care that can be offered in a rural setting. More specifically, the student will see the contrast in the rural and urban setting in managing patients in terms of onsite specialists, onsite medical equipment, and onsite ancillary services. The student will learn that these limited resources may determine the need to transfer the patient to a higher level of care in an urban medical center where their core Emergency Medicine clerkship has been completed.
Prerequisite(s): Successful completion of Phases I and II + 9811
Co-requisite(s): none
Duration: 2 weeks

9110. Elective – A Standard in Wilderness Medicine Education (4 credits):
This four-week elective is an immersive residential experience in wilderness medicine. Over the course of the four weeks, the students will develop the skills and knowledge necessary to practice medicine in an austere environment. They will also learn the skills necessary to survive in such environments and the means by which they can bring patients to definitive care. Their experience will include small group learning, hands-on work stations, and immersive trips to the outdoors. Students will be eligible for Wilderness First Responder Certification at the completion of the course. The course will be taught by nationally known wilderness medicine faculty.
Prerequisite(s): Successful completion of Phases I and II + 9811
Co-requisite(s): None
Duration: 4 weeks
Family Medicine

9201. Elective – Inpatient Geriatric Medicine (2 or 4 credits):
The medical student will do inpatient chart review, history taking, and physical examination. From this information and based on sound geriatric principles, the medical student will develop a differential diagnosis, plan the diagnostic evaluation, and design the geriatric management of the patient. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9812
Co-requisite(s): None
Duration: 2 or 4 weeks

9202. Elective – Post-Acute Ambulatory Geriatrics (2 or 4 credits):
This elective will provide learners the opportunity to follow geriatric patients in multiple settings, inclusive of nursing homes, consultative geriatric ambulatory sites, and residences. Settings will provide learners with opportunities for apply clinical skills learned in clerkships in new settings, including differential diagnosis, chart review, management plan and mental health assessments (e.g., Montreal Cognitive Assessment (MoCA). Learners will explore health care benefits and cost structure in each care setting (e.g., Skilled Nursing benefit).
Prerequisite(s): Successful completion of Phase I + 9812
Co-requisite(s): None
Duration: 2 or 4 weeks

9204. Elective – Rural Family Medicine (2 or 4 credits):
The overall goal of this course is to immerse students in primary care as practiced in a setting distant from immediate access to a tertiary care center. The focus is on the following themes:
- Development of autonomy dealing with common and serious conditions in rural primary care
- Exploration of roles played by physicians in the community
- Service learning, particularly as applied to rural underserved care
- Understanding referral and consultation relationships in a rural environment
The location is an outpatient practice.
Prerequisite(s): Successful completion of Phase I + 9812
Co-requisite(s): None
Duration: 2 or 4 weeks
9205. Elective – Student Health (2 or 4 credits):
The overall goal of this course is to expose students to primary care as practiced in a student health setting. The focus is on the following themes:
- Development of autonomy dealing with common and serious conditions in a student health setting
- Exploration of roles played by physicians in the community
- Understanding the unique challenges and issues associated with caring for a student population
The location is Radford University and is available while the university is in session from August-May.
Prerequisite(s): Successful completion of Phase I + 9812
Co-requisite(s): None
Duration: 2 or 4 weeks

9206. Elective – Acting Internship in Family Medicine (4 credits):
The Acting Internship in Family Medicine is designed to engage fourth-year medical students in learning a high level of responsibility for primary, inpatient care from a unique family medicine approach and to understand the family physician’s role in the hospital setting. Other opportunities for student learning may include assisting with or performing, under supervision, simple procedures; participating in the evaluation of patients in the emergency room under the supervision of an upper-level resident; working in the antepartum service, labor and delivery, and the obstetrical wards, as these areas relate to family medicine training. The preceptor is the Family Medicine inpatient attending and the location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9207. Elective – Functional Medicine (2 credits):
This elective will consist of two weeks of consulting on patients in different clinical, exercise, and consultative settings. While learning evidence-based practices of helping individuals and families adopt and sustain healthy behaviors that affect health and quality of life, the medical student will also be challenged to create a personal two-week plan for lifestyle modification based upon results of an initial panel of lifestyle questionnaires and an initial evaluation of physical and nutritional fitness.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 weeks

9208. Elective – Acting Internship in Family Medicine – Inpatient and Outpatient (4 credits):
The Acting Internship in Family Medicine is designed to engage fourth-year medical students in learning a high level of responsibility for primary, inpatient, and outpatient care from a unique family medicine approach and to understand the family physician’s role in the hospital and ambulatory settings. Other opportunities for student learning may include assisting with or performing, under supervision, simple procedures; participating in the evaluation of patients in the emergency room under the supervision of an upper-level resident; working in the antepartum service, labor and delivery, and the obstetrical wards, as these areas relate to family medicine training. The students may also work in the pediatric wards, the newborn nursery, and the intensive care unit, as these are all areas where the Family Medicine service cares for patients in the hospital. The preceptors are the attendings in the various settings. The locations are the outpatient practice and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

**9P01. Elective – Clinical Quality (2 credits):**
The purpose of this elective is to provide an introduction to the fundamentals of efforts to ensure the quality and safety of clinical care provided in an inpatient setting. The location is Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phases I and II  
Co-requisite(s): None  
Duration: 2 weeks*

**9P02. Elective – Medical Spanish (2 credits):**
Students will learn the Spanish language as used in the clinical setting. This elective is mostly non-clinical and will be in a classroom setting. There will be opportunities to enter the clinical setting with an interpreter. The location is Virginia Tech Carilion School of Medicine.

*Prerequisite(s): Successful completion of Phases I and II  
Co-requisite(s): None  
Duration: 2 weeks*

**9P03. Elective – Burnout-Proof Your Medical Career (2 credits):**
In this course, conditions and situations that promote burnout in physicians will be covered. Burnout is a long-term stress reaction marked by emotional exhaustion, depersonalization, and a lack of sense of personal accomplishment. Examples of discussions include causes of psychological distress and management of and maintenance of relationships. Resilience-building strategies will be applicable throughout a medical career and will be discussed. Students will learn how to apply these strategies to all aspects of their lives and will be able to create resilience networks throughout their practice and systems. Several work and home scenarios will be explored via discussion and role-playing. Adaptive and maladaptive responses to such scenarios will be explored. This is a virtual elective.

*Prerequisite(s): Successful completion of Phase I  
Co-requisite(s): None  
Duration: 2 weeks*
9P04. Elective – Spirituality and Medicine in Clinical Care (2 credits):
The overall goal of this course is to enhance the ability of medical students to appropriately address
spiritual issues arising within patient care. Students will be immersed in ways spiritual and religious
orientation may impact patients’, physicians’, and/or caregivers’ perspectives on clinical
decision-making and health and well-being. Topics covered include concepts in spirituality and
medicine, specialty-specific application of spirituality and medicine, research on
spirituality and medicine, pastoral care models, understanding the role of chaplains and other health
care professionals, and approaches to clinical application of spirituality in patient care. This will be
accomplished through participation in descriptive narratives and discussion with facilitator(s).
Prerequisite(s): None
Co-requisite(s): None
Duration: 2 weeks

9P05. Elective – Disaster Management in Healthcare (2 credits):
Physicians typically provide care under circumstances that are either routine, urgent, or emergent due
to the activity of a medical illness. Situations may arise in which the healthcare institution enters a
disaster status and/or activates an Incident Command Team. This course will give the student insight
into the operations of a healthcare institution in response to an ongoing crisis situation. Topics covered
include etiologies of disaster, roles of team members on Incident Command Team, scope/effect of
disasters (physical structure, staffing, delivery of care), psychological challenges, communications, and
interprofessionalism. This course is only available during the time of an actual disaster which requires
activation of the Incident Command Team for a prolonged timeframe.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9P06. Elective – History of Medicine (2 credits):
This elective is a course primarily focusing on development of medicine in the western world from
antiquity to the later 19th century. The course will highlight individuals, theory, and practice. The course
will also explore the role of social, cultural, and religious forces in influencing the practice of medicine.
The contents of this course are offered uniquely in the discussions and readings of the course and
provide a background to the path of medicine as we know it and practice it today.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9P07. Elective – Quality and Safety in Healthcare (2 credits):
This course is designed to provide exposure to important aspects of both patient safety and healthcare
quality. The student will spend time shadowing experts in the fields of human factors, infection
prevention, process improvement, event reporting, and root cause analysis. Students will participate in
deep dives to understand the root causes of healthcare associated infections (Referred to as HAIs
moving forward) and can identify ways for performance to improve. In addition, the students will spend
time with physicians who are quality improvement leaders in their sub-specialties. The student will join
safety huddles and various patient safety meetings as their schedule allows. The student will present an
article of their choosing at a hospital-wide quality meeting.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks
9P08. Elective – Health Systems Science in Action: Departmental Leadership (2 credits):
This elective is being offered as an experience in Health Systems Science (HSS). The overall goal of this course is to provide medical students with an opportunity to gain exposure to the practical application of HSS at the departmental leadership level. This will be a two-week elective providing the student insight into the day-to-day activities of departmental leadership and the opportunity to serve a value-added role using their background in HSS to examine a systems issue relevant to the department.
The student will be required to attend all activities designated by departmental leadership towards fulfillment of learning objectives and submit an A3 format report summarizing the departmental issue and plan of action.
The student must contact the Course Director(s) at least one month prior to the elective select a project and ensure that arrangements are in place prior to the start of the elective.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9P09. Elective – Global Neurosurgery (4 credits):
This elective will focus on understanding neurosurgery from the perspective of a global view. Immersive experience in which students will work with the neurosurgery team at the Bir Hospital (National Academy of Medical Sciences), Nepal. Beyond acquiring knowledge and skills related to complex neurosurgical cases, insight into the dynamics of an alternative healthcare landscape, a nuanced understanding of the challenges and solutions unique to global healthcare contexts will be experienced. Students will learn to foster global citizenship and learn effective communication skills needed in cross-cultural health care settings. Students will gain an appreciation for diverse healthcare landscapes and the importance of adapting medical practices to different cultural and socioeconomic contexts.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

### 9301. Elective – Clinical Infectious Diseases (4 credits):
This elective will consist of consulting on patients who are hospitalized with infections. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the student will develop a differential diagnosis, plan the diagnostic evaluation, and design the infectious disease management of the patient, based on sound microbiological, antibiotic, and physiological principles. The preceptor is the attending on the inpatient service and the location is Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phase I + 9813*  
*Co-requisite(s): None*  
*Duration: 4 weeks*

### 9302. Elective – Cardiology Consults (2 or 4 credits):
The Cardiology Consult elective will give the medical student an introduction in rendering consultative advice on a wide variety of cardiovascular issues in a hospital setting. Typical patients will include pre-operative clearance for non-cardiac surgeries, post-operative complications including arrhythmias and hemodynamic instability, or patients with acute coronary syndromes, heart failure, or other cardiovascular issues admitted to non-cardiology services. The student will perform complete reviews of the patient’s electronic medical record, take an independent history, and perform a complete
physical examination. From this information, the student will develop a differential diagnosis, plan the diagnostic studies including laboratory tests and imaging studies, and design the cardiovascular management plan for the patient. The student will be part of the rounding team that will include the attending, cardiology fellow, and often one or more medical residents. The student will review his/her management plan with the fellow and/or resident before presenting it to the attending. The preceptor is the attending on the inpatient service and the location is Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9813  
Co-requisite(s): None  
Duration: 2 or 4 weeks

9303. Elective – Rheumatology (2 or 4 credits):
This elective will consist of consulting on patients with a focus on outpatient care. While there may be an occasional inpatient consultation, the majority of experience will be in the evaluation and treatment of musculoskeletal problems and rheumatologic diseases in the outpatient setting. The medical student will evaluate the patient with chart review, complete history, physical examination, and documentation in EPIC. From this information, the student will develop a differential diagnosis, plan the diagnostic evaluation, and be able to outline treatments for the common mechanical, degenerative, and inflammatory musculoskeletal problems of rheumatologic diseases. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I  
Co-requisite(s): None  
Duration: 2 or 4 weeks

9304. Elective – Physical Medicine and Rehabilitation (2 or 4 credits):
Students will learn how to assist individuals who have permanent impairments (paralysis, sensory loss, cognitive dysfunction, alteration of consciousness, decreased endurance, etc.) in identifying their remaining abilities and developing them to their maximum potential. There is a strong emphasis on the team approach, with communication as the vital link between team members, most importantly the patient and the patient’s family. We will try to focus on issues that students will likely see in their primary practices. The location is the Rehabilitation Unit at Carilion Roanoke Community Hospital.

Prerequisite(s): Successful completion of Phase I  
Co-requisite(s): None  
Duration: 2 or 4 weeks

9306. Elective – Pulmonary Medicine (2 or 4 credits):
This elective consists of consulting and evaluating patients with pulmonary diseases in the inpatient and outpatient settings. The medical student will do the patient’s chart review, history taking, and physical examination. From this information and the integration of physiopathological principles, the student will develop a differential diagnosis, learn how to prioritize, and propose a treatment plan. The preceptor is the inpatient attending and the locations are the outpatient office and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9813  
Co-requisite(s): None  
Duration: 2 or 4 weeks
9307. Elective – Ambulatory Internal Medicine (2 or 4 credits):
Students will be paired with a faculty member in Internal Medicine. Students will be exposed to a wide array of patients with diseases and conditions typically seen in an outpatient internal medicine setting, such as diabetes, hypertension, and chronic lung disease. Students will learn to do a focused history and physical exam pertinent to the patient’s reason for being seen. Students will then report their findings to the attending physician and together formulate a management plan for the patient. The preceptor is the ambulatory faculty attending and the location is Carilion Clinic Riverside complex.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 or 4 weeks

9308. Elective – Palliative Medicine (2 or 4 credits):
This elective will consist of consulting on patients who are hospitalized with serious illnesses. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the student will be able to synthesize information to develop an interdisciplinary plan of care incorporating palliative care principles for the patient and family that address comprehensive views of suffering. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9813
Co-requisite(s): None
Duration: 2 or 4 weeks

9309. Elective – Acting Internship in Internal Medicine (4 credits):
The Internal Medicine Acting Internship (AI) elective seeks to provide the senior medical student an inpatient learning experience similar to that of a PGY1 internal medicine resident. The student will be assigned to an inpatient faculty internal medicine teaching team comprised of an attending physician, a PGY2 or PGY3 resident, two PGY1 residents, and possibly one or two other medical students. The student will be assigned patients who are admitted to their team and will assume an integral role in providing care for that patient during their hospitalization. The student on the AI elective will be assigned duties and responsibilities very similar to those of the PGY1 residents. These duties include, but are not limited to, taking a complete history and performing a complete physical on the patients assigned to them, initiating appropriate orders on their patients, which will require co-signature, following the patient throughout their hospitalization, and assisting with discharge planning. The AI student may also be involved in procedures on their patients when indicated. The student will be expected to be on call when their team is on call, including overnight call similar to other PGY1 residents, as well as follow all duty hour rules of the program. The student will also be expected to participate in teaching activities including contributions to teaching rounds and morning report. The student will be expected to attend the didactic conferences provided to the students and residents. The preceptor is the inpatient attending and the location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9310. Elective – Acting Internship in Cardiology (4 credits):
The fourth-year medical student who takes this elective will be immersed in a busy inpatient cardiology service with exposure to a wide spectrum of cardiovascular diseases including acute coronary syndromes, valvular heart diseases, cardiomyopathies, and common dysrhythmias. He/she will also help manage an outpatient cardiology observation unit. Most patients in the observation unit will be low-risk patients with chest pain or those with heart failure exacerbations. Chest pain patients will be ruled out for myocardial necrosis, then undergo appropriate non-invasive studies such as exercise treadmill testing, exercise or dobutamine stress echocardiography, nuclear cardiology study
(e.g., Lexiscan), or cardiac computed tomographic angiography study. The Acting Intern (AI) will be involved in deciding the most appropriate noninvasive/imaging modality for the patient as well as participate in analyzing the electrocardiogram (ECG) and imaging aspects of the study. Patients with heart failure will be investigated for etiology of HF exacerbation and have appropriate diagnostic studies and adjustment of medical regimens. Some of the patients from the observation unit will be admitted to the AI's inpatient service. The AI will work closely with the attending, mid-level provider, and resident. On most rotations, a cardiology fellow will also be involved in teaching the AI and intern. The preceptor is the inpatient attending and the location is Carilion Roanoke Memorial Hospital.

**Prerequisite(s): Successful completion of Phases I and II**

**Co-requisite(s): None**

**Duration: 4 weeks**

**9311. Elective – CCU (2 or 4 credits):**

The Coronary Care Unit (CCU) provides intensive care for a wide range of cardiovascular issues. The student will be exposed to unstable acute coronary syndromes, cardiogenic shock, decompensated heart failure, unstable rhythms, hypothermia protocol, and many other unstable cardiac conditions requiring intensive care. The elective occurs in the CCU of Carilion Roanoke Memorial Hospital, and the student will work with the CCU team to provide care for the patients in the unit. The student will participate in cardiac catheterizations and other procedures as warranted. The preceptor is the CCU faculty attending.

**Prerequisite(s): Successful completion of Phases I and II**

**Co-requisite(s): None**

**Duration: 2 or 4 weeks**

**9312. Elective – Dermatology (2 or 4 credits):**

The medical student will do the patient's chart review, history taking, and physical examination. In consultation with the attending, the student will develop a differential diagnosis, plan the diagnostic evaluation, and design a management plan for the patient’s skin disease. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

**Prerequisite(s): Successful completion of Phase I + 9813 + 9819**

**Co-requisite(s): None**

**Duration: 2 or 4 weeks**

**9313. Elective – Gastroenterology (2 or 4 credits):**

Students will be exposed to a wide array of common and unusual gastrointestinal conditions. Additionally, students will attend procedures in the endoscopy suite. They will review the patient’s chart, obtain a pertinent history, and perform an appropriate physical examination. In consultation with the attending, students will develop a differential diagnosis, plan the diagnostic evaluation, and design management options for the patient’s gastrointestinal disease. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

**Prerequisite(s): Successful completion of Phases I and II**

**Co-requisite(s): None**

**Duration: 2 or 4 weeks**
9314. Elective – Hematology/Oncology (2 or 4 credits):
This elective will consist of working primarily in the outpatient setting in conjunction with the faculty hematologist/oncologist. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the student will develop a differential diagnosis, plan the diagnostic evaluation, and discuss the patient’s management options with the attending. The location is Blue Ridge Cancer Care.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9315. Elective – Medical ICU (2 or 4 credits):
This elective is intended to expose medical students to a wide variety of acute and sub-acute medical pathologies and to enable them to provide physiologic support for patients who have suffered acute catastrophic insult. Students will gain experience in coordinating the management of critically ill patients with multiple health care providers and will apply evidence-based concepts to diagnosis, care, and outcome prediction of critically ill patients. The preceptor is the Intensive Care Unit attending and the location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9316. Elective – Nephrology (2 or 4 credits):
This elective will consist of inpatient/outpatient work in conjunction with the nephrologist. The medical student will learn about fluid management as well as dialysis management and the illnesses that typically accompany renal disease such as hypertension (HTN). The preceptor is the attending of record from Valley Nephrology and the location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9317. Elective – Occupational Medicine (2 credits):
In the United States the majority of citizens are employed. It is well known that a productive lifestyle is important to the mental and emotional well-being of an individual. Persons who suffer from chronic illness or injury that result in unemployment have significantly higher than average rates of drug and alcohol abuse, divorce, suicide, and a decrease in life expectancy. This elective will consist of seeing patients in the Carilion Clinic Occupational Medicine Clinic.
Prerequisite(s): Successful completion of Phase I + 9813
Co-requisite(s): None
Duration: 2 weeks

9318. Elective – Advanced Physical Medicine and Rehabilitation (2 credits):
In this elective, the student will learn how to assist individuals who have permanent impairments (paralysis, sensory loss, cognitive dysfunction, alteration of consciousness, decreased endurance, etc.) in identifying their remaining abilities and developing them to their maximum potential. There is a strong emphasis on the team approach, with communication as the vital link between team members, most importantly the patient and the patient’s family. We will try to focus on issues that the student will likely see in their primary practice. On the Advanced Physical Medicine and Rehabilitation rotation, the student will be engaged in discharge planning and follow-up planning and is expected in general to have a wider knowledge base of how to care for patients on the service. The student will make an oral
presentation to the preceptor on a topic agreed upon by the preceptor and the student. The M4 student will be expected to gain a level of independence on the Advanced PM&R elective that is indicative of their prior experience in a PM&R setting. The location is the Rehabilitation Unit at Carilion Roanoke Community Hospital.

Prerequisite(s): Successful completion of Phases I and II + 9304
Co-requisite(s): None
Duration: 2 weeks

9319. Elective – Advanced Dermatology (4 credits):
The medical student will do the patient’s chart review, history taking, and physical examination. In consultation with the attending, the student will develop a differential diagnosis, plan the diagnostic evaluation, and design a management plan for the patient’s skin disease. The student will review the literature and make a 15-minute oral presentation to the attending on a relevant topic agreed upon by the attending and the student. The student will be expected to be more actively engaged in diagnosis and treatment planning with skills congruent to having had a previous dermatology elective and will be expected to be more involved in the management of procedures in the office setting. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phases I and II + 9312
Co-requisite(s): None
Duration: 4 weeks

9320. Elective – Hospice (2 credits):
Students will make home visits with home health nurses, a physician, and a nurse practitioner. They will attend the interdisciplinary team rounds on Thursday mornings and will learn the regulations around eligibility for hospice services.

Prerequisite(s): Successful completion of Phase I + 9813
Co-requisite(s): None
Duration: 2 weeks

9321. Elective – Radiation Oncology (2 or 4 credits):
Students will learn the principles of radiation oncology as well as communication skills with patients who have been determined to have a malignancy which may be responsive to radiation. Students will also learn interprofessionalism through communication with techs, nursing staff, and possibly oncologists. The location is Blue Ridge Cancer Care.

Prerequisite(s): Successful completion of Phase I + 9818
Co-requisite(s): None
Duration: 2 or 4 weeks

9322. Elective – Basic Dermatology (2 credits):
The Elective is an online dermatology course for students who may utilize the skills learned in any specialty of clinical practice. Included in this course are terminology for describing the morphology of basic skin lesions, the appropriate conduction of a skin exam, forming a differential diagnosis based on morphologic diagnosis, recognizing characteristic appearances of benign and malignant skin lesions, describing drug reactions, and identifying therapies for dermatologic illnesses or lesions.

Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 weeks
9323. Endocrinology (2 credits):
Throughout the course, the student will be exposed to the variety of hormonally active conditions in a clinical setting. The student will examine patients while practicing empathy and identify endocrine problems to include but not limited to diabetes, thyroid disease, metabolic bone disease, and adrenal and pituitary disease. The student will utilize appropriate laboratory and radiological data. Supplemented by this will be a series of didactic presentations led by experts in the field of Endocrinology to complete a review of the common conditions encountered and their treatment.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9324. Elective – COVID-19 Pandemic (2 credits):
The goal of this elective is to provide a comprehensive look at the COVID-19 worldwide pandemic to include but not limited to an emphasis on the local efforts to respond to the crisis. Topics covered will include virology, epidemiology, ethics, communication, psychological challenges of healthcare workers, healthcare resources, utilization of limited resources, and preventative measures to reduce spread of disease.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9325. Elective – Procedures and Pharmacology in Physical Medicine and Rehabilitation (2 credits):
This two-week elective provides the student insight into incorporating acupuncture and integrative medicine into modern medical practice, as well as practical applications for the use of Botulinum toxin injections for spasticity and other approved diagnoses. Students will also learn the basic principles of electromyography and nerve conduction study, and pain management in a Physical Medicine and Rehabilitation setting.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 weeks

**9G02. Elective – Global Health – Mungeli, India (4 credits):**

The purpose of this 4-week elective is to allow the student to broaden their medical knowledge through observing or/and assisting doctors in clinics and to get acquainted with health care in Mungeli, Chhattisgarh. Founded in 1897, Christian Hospital Mungeli (CHM) is a 120-bed hospital that provides a broad spectrum of modern medical services to the people of Mungeli, Chhattisgarh and the surrounding districts. CHM also operates a nursing school and administers the 600-student Rambo Memorial English Medium School.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-requisite(s): None*

*Duration: 4 weeks*
9G03. Elective – Global Health – Kazan, Russia, Kazan State Medical University (4 credits):
The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing or/and assisting doctors in clinics and to get acquainted with health care in Kazan. The student will have an opportunity to participate in the longitudinal care of patients, review images and lab studies, and learn and practice basic surgical techniques. There will also be the opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, and medical education in the culture of Russia. There may also be the opportunity to work in the Clinical Skills Center and with standardized patients.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing or/and assisting doctors in clinics and to get acquainted with health care in Saint-Lô, France. The Memorial Hospital of Saint-Lô has paved the way for modern hospitals since WWII. When it opened in May 1956, it was commonly referred to by experts as "the most modern hospital in France or in Europe" and it still strives to be so. The hospital was built and is still partially funded by money from the USA, as part of reparations as a result of accidental friendly fire on the city during the D-Day invasion. The student may have the opportunity to rotate through general medical units or specific subspecialty practices. The student is expected to participate in grand rounds and other educational programs related to their rotation. There are opportunities with the nursing school for interprofessional rounds and training. The student will have an opportunity to participate in the longitudinal care of patients, review images and lab studies, and learn and practice basic surgical techniques. There will also be the opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, and medical education in the culture of France.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9G05. Elective – Global Health – Wonju, South Korea, Yonsei University Wonju College of Medicine (4 credits):
The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing or/and assisting doctors in clinics and to get acquainted with health care in Wonju, South Korea. Composed of a pre-medical school, medical school, nursing school, and school of dental hygiene, the Wonju College of Medicine emphasizes Christian-based medical education. The school has 147 full-time faculty members and affiliates with Wonju Christian Hospital, a partnership that enables students to have early clinical training. The student will have an opportunity to participate in the longitudinal care of patients, review images and lab studies, and learn and practice basic surgical techniques. There will also be the opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, and medical education in the culture of Korea. There are other health professional schools on campus so opportunity exists for interprofessional rounds and training. There are likely to be other international medical students on campus.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks
9G06. Elective – Global Health – Pop Wuj, Guatemala (2 or 4 credits):
The purpose of this elective is to allow the student to broaden their medical knowledge through intensive one-to-one Spanish instruction in Guatemala. Since June 2002, Pop Wuj has offered a Medical Spanish Program for medical students, providers, public health professionals, and other health care practitioners which provides health and medical education as well as clinical experience in Guatemala. One of the most important goals of this program is to increase students’ cultural competency in addition to their Spanish language skills. To deliver health care in a compassionate way, with the knowledge of the culture and history of the population one works with, is an essential value to Pop Wuj’s vision of the Medical Spanish Program.
Prerequisite(s): Successful completion of Phases I and II + must have some Spanish language proficiency
Co-requisite(s): None
Duration: 2 or 4 weeks

9G07. Elective – Global Health, Brazil, Florianópolis, University of Southern Catarina (4 credits):
The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing and/or assisting doctors and other health care professionals in outpatient and inpatient settings in Brazil. This elective will also provide an opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, and medical education in the culture of Brazil. It is expected that students will spend 3-4 weeks with the University of Southern Catarina (UNISUL) located in Santa Catarina state, which includes Florianópolis, a sister city of Roanoke. The course will be tailored to the student’s needs, but offers a great opportunity to explore health care disparities and funding in challenging times within the Brazilian health care system. More information can be found at: www.unisul.br.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9G08. Elective – Global Health – Rio de Janeiro, Brazil, Berkeley Institute for Simulation (2 credits):
The purpose of this two-week elective is to allow the student to broaden their medical knowledge through observing and/or assisting doctors and other health care professionals in simulation trainings and curriculum design for interprofessional health care professionals from throughout Brazil. This elective will also provide an opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, systems of health care, and medical education in the culture of Brazil. The elective can be done in conjunction with the four-week elective for Florianópolis, Brazil.

The two-week elective in Rio de Janeiro involves working and observing at the Berkeley Institute for Simulation. This center provides health care simulation to a variety of professionals and students involved in EMS and the provision of health services. This elective would be tailored based on dates and curricular schedule at the center. In addition, there is a company, IBKL, associated with the institute that health care companies engage with to meet their individual academic needs through simulation modules. The VTCSOM student will have an opportunity to observe the business side of simulation centers as well as the academic delivery of simulations to various health care professionals throughout Brazil. More information can be found at: www.berkeley.com.br or www.ibkl.com.br
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks
9G09. Elective – Global Health – New Taipei City, Taiwan, MacKay Memorial Hospital (4 credits):
The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing and/or assisting doctors and other health care professionals in outpatient and inpatient settings in Taiwan. This elective will also provide an opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, and medical education in the culture of Taiwan. It is expected that students will spend four weeks within various clinical rotations at MacKay Memorial Hospital or a nearby affiliate. These hospitals and clinics are part of the MacKay Medical College system. The course will be tailored to the student’s needs and offers a variety of clinical experiences in an urban and unique cultural setting. More information can be found at: [http://eng.mmh.org.tw/dnn](http://eng.mmh.org.tw/dnn).
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9G10. Elective – Global Health – Kaohsiung City, Taiwan, E-Da Hospital/I-Shou University (4 credits):
The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing and/or assisting doctors and other health care professionals in outpatient and inpatient settings in Taiwan. This elective will also provide an opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, and medical education in the culture of Taiwan. It is expected that students will spend four weeks with E-Da Hospital/I-Shou University located in Kaohsiung City, Taiwan. The course will be tailored to the students’ needs and enable them to explore a vibrant and integrated Chinese Medical School and Clinic on site at E-Da Hospital. It also offers the unique opportunity to simultaneously complete a four-week course in traditional Chinese medicine at the School of Chinese Medicine, I-Shou University, developed by Professor Tsai, Head of the Department of Chinese Medicine of E-Da Hospital and Honorable Consultant, I-Shou University. More information can be found at: [http://www.edah.org.tw/english/about.asp](http://www.edah.org.tw/english/about.asp) and [http://www.isu.edu.tw/en1/](http://www.isu.edu.tw/en1/).
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9G11. Elective – Global Health – Taiwan, E-Da Hospital/I-Shou University/MacKay Memorial Hospital (4 credits):
The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing and/or assisting doctors and other health care professionals at two locations in Taiwan (Kaohsiung and Taipei/New Taipei). This elective will also provide an opportunity to learn about global health, health care disparities, global development, cultural exchanges, international affairs, and medical education in the culture of Taiwan. It is expected that students will spend two weeks with E-Da Hospital/I-Shou University located in Kaohsiung City, Taiwan. The course will be tailored to the students’ needs and enable them to explore a vibrant and integrated Chinese Medical School and Clinic on site at E-Da Hospital. More information can be found at: [http://www.edah.org.tw/english/about.asp](http://www.edah.org.tw/english/about.asp) and [http://www.isu.edu.tw/en1/](http://www.isu.edu.tw/en1/).
It is expected that students will spend two weeks within various clinical rotations at MacKay Memorial Hospital or a nearby affiliate. These hospitals and clinics are part of the MacKay Medical College system. The course will be tailored to the student’s needs and offers a variety of clinical experiences in an urban and unique cultural setting. More information can be found at: [http://eng.mmh.org.tw/dnn](http://eng.mmh.org.tw/dnn).
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks
The purpose of this four-week elective is to allow the student to broaden their medical knowledge through intensive one-to-one Spanish instruction in Peru. Since 2011, Medical Electives Network has offered medical electives, including a CME-accredited Medical Spanish Program, in Trujillo and other sites around Peru. The Medical Electives Network was established to provide health and medical education as well as health care Spanish skills in Peru. Elective rotations take place at both government hospitals and non-governmental organizations (NGO) facilities. Conditions at the hospitals vary according to the resources available. Students will experience health care in a developing country and see conditions they may not see in the United States.

In addition to their clinical work, students will develop their general and medical Spanish skills. Classes are taught at all levels, and beginner Spanish speakers have the option of taking an intensive Medical Spanish Program, which offers an additional two hours each morning for the first week or two before beginning the clinical rotation. This provides an opportunity to build language skills before beginning clinic.

The Medical Electives Network program also provides 2-3 community health fairs per month where students will spend the day in a public location helping provide free consultations and medical treatment to patients. Community partners for these events include local municipalities, the national police, and the prison service. Other outreach opportunities include week-long surgical missions (2-3 per year) and volunteering at an orphanage or senior program. More information can be found at: https://medical-electives.net/

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

The purpose of this four-week elective is to allow the student to broaden their medical knowledge through observing or/and assisting doctors in clinical rotations at Wroclaw Medical University while gaining an enhanced understanding of health care in Poland.

The Wroclaw Medical University is one of the most renowned public medical schools in Poland. There are two clinical hospitals: The Individual Public Clinical Hospital and the University Clinical Hospital. Both have the best quality equipment at their disposal, which allows them to conduct diagnostics and treatment at the highest level. Furthermore, the university oversees the Academic Stomatology Policlinic and the Alzheimer’s Centre in Scinawa. The total number of chairs and clinics amounts to 164. Altogether, 1,093 academic professors and teachers work at the university, which currently educates nearly 6,000 students in 10 fields: Medicine, Medicine and Dentistry, Pharmacy, Medical Analysis, Dietetics, Emergency Medicine, Physiotherapy, Nursing, Obstetrics, and Public Health.

Wroclaw Medical University has 39 international agreements of cooperation signed with other universities abroad. There is a wide exchange of students and teaching staff within the framework of the Socrates/Erasmus program of the European Union, especially with France, Germany, Italy, Sweden, Spain, the Netherlands, and England.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
The International Neurology Rotation at Aga Khan University elective offers students the opportunity to learn about pediatric and adult patients with neurological disorders, their comorbid conditions, and the management of illness in the context of the Pakistani medical system. Students participate in both inpatient and outpatient settings. Treatment plans may involve consultation with infectious disease experts.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

This rotation offers students the opportunity to learn about both common and rare infectious diseases and their management in the context of pulmonology, other physiologic systems, and the Argentinian healthcare system. This rotation will include clinical care in the inpatient setting as well as related scholarly work. Additionally, students will participate in a Spanish immersion course taught by experienced instructors in order to develop both basic and medical communication skills and will utilize medical Spanish in patient encounters. Students will study the sociological and economic barriers to health care of the Argentinian people. Students will also have the opportunity to learn about Argentinian culture through the opportunity to participate in historical tours. The goal of this course is to expand students’ clinical and academic knowledge of infectious diseases and pulmonology in the setting of the Argentinian healthcare system while enhancing the students’ medical Spanish skills.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9G16. Elective – Medical Spanish Immersion Program in Tamarindo, Costa Rica (4 credits):
Students participating in the Immersive Medical Spanish, Costa Rica program will receive four-five hours per day of specific in class lessons in Spanish. The course contains an ideal fusion of pedagogy, language learning, and conversational practice in classroom, simulated, and clinical settings. A pretest is administered to gauge the student’s current Spanish fluency and cater their curriculum to the appropriate level of understanding. Students will receive fluency-appropriate private lessons to master common Spanish vocabulary, terms, and phrases appropriate for conversation in common contexts, such as personal greetings, family, school, hobbies, and food. Students will learn correct gendering of nouns and conjugation of verbs in the past, present, future, and reflexive tenses in addition to correct syntax for asking questions. Students will have supervised practice in integrating vocabulary and language patterns through reading, writing, speaking, and listening in Spanish. Basic out of class experiences, such as visits to local markets and community locations, are used to enhance the student’s conversational ability and provide an engaging understanding of the Costa Rican language and culture. Weekly evaluations will be performed to monitor the student’s growing proficiency in basic and medical Spanish.
Additional weekly class time will be dedicated to teaching specific medical vocabulary as well as practice with simulated and real-life medical situations such as patient interviews and family consultations. The medical component of the classroom curriculum will emphasize medical terminology, patient interviews, and anatomy in Spanish, which are reinforced through mock medical interviews with simulated patients. Further, afternoons are spent performing patient visits and in-clinic patient interactions. Some examples of these activities are: clinical time in a local private clinic, clinical time in a nursing home, participation in community health outreach, medical interviews with local host families, visiting local pharmacies, and riding along with local emergency medical services (EMS) providers.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
9G17. Elective – Medical Spanish and Introduction to Tropical Medicine (4 credits):
Upon arrival at the IHCAI Institute, the student’s proficiency in Spanish will be evaluated using standardized oral and written exams. As a result of these assessments, the student will be assigned course work based on that proficiency at a Level 1 – Beginner, Level 2 – Intermediate, or Level 3 – Advanced.

The student will be in a classroom setting receiving instruction in Spanish grammar, vocabulary, pronunciation, and comprehension. Homework will be assigned in the classroom setting. The student will interact with patients in a clinical setting.

The student will attend lectures and seminars on both the Costa Rican Health System and the specific diseases and challenges involved with Tropical Medicine. Simulated patients, medical chart analysis and comprehension, simulated interviews with peers, medical interviews and analysis on 3 different levels of complexity will be common pedagogical activities. By using the skills developed, the student will be able to effectively interview a Spanish-speaking patient, establish a presumptive diagnosis, and give recommendations.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

This elective will provide an in-depth exposure to chronic disease management in Moldova, a low to middle-income former community country. Learners will participate in lectures, learning sessions, and clinical practice at various sites in the county, including the National School of Medicine, national hospital, regional outpatient clinics, and mobile health clinics. Within clinical settings, learners will engage in all aspects of endocrinology diagnosis, evaluation, and treatment. The student will gain an insight into the dynamics of medicine with significant social and economic resource challenges unique to global healthcare contexts. The elective will help foster global citizenship and effective communication skills needed in a cross-cultural healthcare setting.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

This elective will provide in-depth exposure to healthcare, healthcare disparities, and chronic disease management in the low to middle-income regions of rural Southwest Virginia.
The student will spend four weeks rotating in Internal Medicine and/or Family Medicine with the Ballad Health System. Daily rotations will occur in the hospital setting as well as in outlying community clinics. As available, the student may also spend time in the mobile Health Wagon clinic and other community wellness clinics in the area. Additional supplemental activities, lectures, and learning sessions will also be part of the elective.

The student will gain an insight into the dynamics of medicine, with significant social and economic resource challenges unique to rural and low-income healthcare contexts. The elective will help foster the effective communication skills needed in a diverse socioeconomic healthcare setting.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9M01. Elective – Medical Education (2 credits):
The purpose of this elective is to provide an introduction to the fundamentals of adult learning, an opportunity to apply and improve teaching skills in a medical setting, and preparation as a future physician-educator. The student will learn to effectively facilitate in a small group learning process utilizing the principles of adult learning and skills of effective feedback, review and write cases for education and evaluation, and how to be an active member of the medical education team participating in basic curriculum design and development.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9M02. Elective – Surviving a Malpractice Lawsuit (2 credits):
This course uniquely explores the nature of medical errors, medical malpractice lawsuits, and their effect upon the practitioner. This course will explore the student’s role in the health care delivery landscape, methods of limiting related risk, methods of managing inherent emotional/psychological sequelae, and strategies for personal conduct. We will discuss real-life examples and practice testifying in deposition. We will review other major medical-legal entities that a physician might encounter in his/her career, as well as the importance of maintaining wellness throughout the stressful medical-legal process. This is a virtual elective.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 weeks

9M03. Elective – Academic Medicine Leadership (2 credits):
The Academic Medicine Leadership elective provides medical students an opportunity to engage in and learn core principles of academic medicine and leadership. This longitudinal elective (equivalent to a two-week elective, minimum 30 hours) will provide individuals the opportunity to actively engage in the change management process of the medical school by working directly with leaders who are responsible for leading change within the education mission of VTCSOM. Participants will learn through several methods: (1) participating in observing strategic planning meetings related to curricular reform, (2) contributing to the development of strategic planning workshop design and data collection, (3) attending meetings with the Senior Associate Dean for Medical Education to synthesize findings and explore questions related to change management in medical education, (4) attending meetings with other senior leadership at VTCSOM who are involved in the change process, and (5) designing and completing a final reflection project that integrates lessons learned with influence on future career.

**9401. Elective – Vascular Neurology (2 credits):**
Stroke accounts for more than half of all neurology inpatient admissions and is the leading cause of neurologic mortality. This elective will provide education in acute stroke treatment, stroke prevention, and stroke diagnosis. The goals are to master current principles of the diagnostic evaluation of patients with cerebrovascular disease, become skilled in the acute treatment of stroke, and acquire proficiency in treatments to prevent stroke. This location is Carilion Roanoke Memorial Hospital.

*Prerequisite(s):* Successful completion of Phase I  
*Co-requisite(s):* None  
*Duration:* 2 weeks

**9402. Elective – Inpatient Consults (2 credits):**
This elective will be offered to fourth-year medical students seeking a more extensive exposure to inpatient neurology. This elective is intended for students interested in intensive care or hospitalist medicine, emergency medicine, neurology or neurosurgery. It deals with inpatients suffering from strokes, metabolic encephalopathies, seizures, and neurologic complications of non-neurologic conditions. In this setting, students will work with faculty attendings to evaluate patients on a busy consult service. Students will present their findings directly to the attending who will review the case with them. Appropriate supervision will be provided. There will be time to review the relevant literature prior to presenting these cases. The location is Carilion Roanoke Memorial Hospital.

*Prerequisite(s):* Successful completion of Phase I  
*Co-requisite(s):* None  
*Duration:* 2 weeks

**9403. Elective – Outpatient Neurology (2 credits):**
This elective will be offered to fourth-year medical students seeking a more extensive exposure to outpatient neurology. An individualized program will be prepared by the course director to suit the particular interests of each student. The student may choose from a wide variety of neurologic subspecialty experiences including movement disorders, epilepsy, electromyography (EMG) and neuromuscular disease, among others, but will also spend at least 50% of the time seeing general neurology consultations. Outpatient evaluation and management of neurological complaints is often challenging for physicians. Performance of simple exam skills and knowledge of a few clinical principles make it much easier to manage these patients in an efficient and cost-effective manner. The location is Carilion Clinic Riverside complex.

*Prerequisite(s):* Successful completion of Phase I  
*Co-requisite(s):* None  
*Duration:* 2 weeks
9404. Elective – Acting Internship in Neurology (4 credits):
This elective is designed for fourth-year medical students with a strong interest in neurology who intend to pursue residency training in neurology (or a related discipline including, but not limited to, Neurosurgery or Psychiatry). The goal of this elective is to give students an opportunity to take an active role on the neurology team in both inpatient and outpatient settings. Emphasis will be placed on improving skills in taking a thorough and relevant history, performing complete, as well as problem-focused neurological examinations, ordering diagnostics, and formulating treatment plans. Students may also assist residents or attending physicians in procedures as appropriate. Students will rotate for two weeks on the inpatient consult service to gain experience with a wide breadth of neurological diseases. Students will also spend a week on the stroke team to increase depth of knowledge in vascular neurology and a week in the outpatient clinic to develop experience with multiple sclerosis, headache, movement disorders, neuromuscular diseases, and epilepsy. Depending on the student’s interests and availability of resources, experience in the Epilepsy Monitoring Unit may be arranged. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks
Obstetrics and Gynecology

**9501. Elective – Reproductive Endocrinology and Infertility (2 credits):**
This elective is designed for a student interested in obstetrics and gynecology or primary care with a strong emphasis on women’s health. This elective will expose the student to the evaluation and management of patients with infertility problems, endometriosis, menstrual abnormalities, polycystic ovary syndrome, and uterine fibroids. The student will also gain exposure and learn to perform transvaginal ultrasound in infertility and gynecologic patients. This is primarily an outpatient rotation but will include one half day a week in the operating room. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phases I and II*
*Co-requisite(s): None*
*Duration: 2 weeks*

**9502. Elective – Urogynecology (2 credits):**
This elective is designed for a student interested in obstetrics and gynecology or primary care with a strong emphasis on women’s health or a surgical subspecialty. This elective will expose the student to the evaluation and management of patients with pelvic organ prolapse and urinary incontinence. The student will be involved in the outpatient management of patients with the above conditions. They will become familiar with medical and surgical management options. The student will have an opportunity to participate in fitting pessaries and observing urodynamics and outpatient cystoscopy. At least one day a week will be spent in the operating room and the student will be responsible for following post-operative patients during their hospital stay. Students will also participate in Friday morning didactics with the residents. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phases I and II*
*Co-requisite(s): None*
*Duration: 2 weeks*
9503. Elective – Acting Internship in Gynecologic Oncology (4 credits):
This is a sub-internship elective designed for a student interested in obstetrics and gynecology or a surgical subspecialty. The student will gain experience in the outpatient evaluation of patients with potential gynecologic malignancies. The student will observe and assist with surgical cases including robotic cases. The student will gain an understanding of post-operative management of complicated surgical patients and will round on these patients with the gynecologic oncology team as an acting sub-intern. The student will be expected to present a topic of their choosing to the team at the end of the rotation or participate in an oral exam given by one of the gynecologic oncologists. The fourth-year student will participate in the same didactic curriculum with the residents. There is no on-call responsibility, but the student will be expected to participate in inpatient rounds during two of the four Saturdays. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9504. Elective – Acting Internship in Maternal Fetal Medicine (4 credits):
This elective is designed to provide the participating student with exposure to the breadth of high-risk obstetrics. The student will evaluate and manage high-risk obstetrical patients in the office and hospital setting. In the outpatient setting the student will participate in genetic counseling sessions, ultrasound and Maternal Fetal Medicine consultations including conditions of anemia, diabetes mellitus, urinary tract disorders, infectious diseases, asthma, surgical abdomen, and chronic hypertension. The student will participate in the care of patients with preterm labor, in the care of patients when fetal anomalies are identified, and in the care of patients with multifetal gestations. The student will interact with the Maternal Fetal Medicine attendings, OB residents, genetic counselors and sonographers. The student will participate in the management of acute and high-risk obstetrical conditions by rounding daily on the antepartum service with the residents and faculty. The student will participate in intrapartum management during this rotation. There is no call requirement for this rotation.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9505. Elective – OB-GYN Boot Camp (2 credits):
This 2-week elective is designed for 4th year medical students who will enter an obstetrics and gynecology residency after graduation. Students will review and manage obstetrical and gynecologic conditions. This elective is modeled after the CREOG-APGO Step Up to Residency curriculum, and will include self-study, didactics, computer modules, simulation, and clinical time. The goal of this elective is for each student to be prepared for entering residency, with the following national objectives set by CREOG-APGO: enhance knowledge of applications of simulated patient cases; practice skills helpful in early stages of residency; discuss critical skills necessary for success in residency. If there are fewer than three students enrolled, then the elective will include self-study, computer modules, and clinical time but there will not be simulation or didactic time.
Prerequisite(s): Years 1, 2, 3 + all core clerkships
Co-requisite(s): None
Duration: 2 weeks

9506. Elective – OB-GYN New River Valley (4 credits):
This elective is designed to provide an opportunity for the student to gain experience in ambulatory and hospital settings caring for both obstetrical and gynecologic conditions. The student will be expected to participate in the evaluation and management of common ambulatory gynecologic complaints including, but not limited to, contraception, abnormal uterine bleeding, pelvic pain, and well woman care.
Students will be involved in the pre-operative, surgical, and post-operative care of patients with gynecologic conditions requiring minor and major surgery. The student will also participate in the ambulatory and inpatient management of obstetrical patients. They will provide routine prenatal care and learn about management of more complex conditions such as gestational diabetes and hypertension in pregnancy. Students will also assist with vaginal and cesarean deliveries and participate in the postpartum care of these patients. This elective is to assist the student in understanding the type of care that can be offered in a rural setting. The locations are the outpatient office and Carilion New River Valley Medical Center.

**Prerequisite(s):** Successful completion of Phase I + first half of year 3 + 9819

**Co-requisite(s):** None

**Duration:** 4 weeks

**9507. Elective – Acting Internship in Minimally Invasive Gynecologic Surgery and Pelvic Pain (4 credits):**

This course is designed for exposure to the assessment and treatment of advanced gynecologic pathology. This experience will provide experience in both the clinic and operating room for patients with chronic pelvic pain symptoms. The student will participate directly in all aspects of care including initial outpatient consult and workups in clinic, decision analysis of treatment modalities including but not limited to physical exam assessment, surgical planning, medical regimens, incorporations of pelvic physical therapy, trigger point injections, and amendment of treatment plans. Emphasis will also be placed on intra-operative exposure and participation in laparoscopic and hysteroscopic surgeries each week. The student will be required to observe the duties of an on-call physician (home call for one weekend) during the clerkship. Travel will be involved to Carilion Stonewall Jackson Hospital in Lexington, VA and to Carilion Franklin Memorial Hospital in Rocky Mount, VA.

**Prerequisite(s):** Successful completion of Phases I and II

**Co-requisite(s):** None

**Duration:** 4 weeks

**9508. Elective – Acting Internship in Urogynecology (4 credits):**

This course is designed as a well-rounded exposure to the assessment and treatment of pelvic floor disorders, clinically and surgically within the specialty of Obstetrics and Gynecology (OBGYN). The student will participate directly in all aspects of care including initial outpatient consult and workups in clinic, decision analysis of treatment modalities including but not limited to physical exam assessment, surgical planning medical regimens, incorporations of pelvic floor physical therapy, and amendment of treatment plans. Emphasis will also be placed on intra-operative exposure and participation in surgeries each week, and students will round postoperatively on patients on remain inpatient. In the inpatient and outpatient setting, the student is required to function at the level of an acting intern. The student will have the opportunity to observe pelvic floor physical therapy, urodynamics, and other office-based procedures. Attendance and participation in multidisciplinary conferences and didactics will also be expected. Students will be required to give a brief presentation at the end of the rotation on a literature review of a pertinent urogynecologic topic of their choice.

Travel will be involved to Carilion New River Valley Medical Center, Christiansburg, VA.

**Prerequisite(s):** Successful completion of Phases I and II

**Co-requisite(s):** None

**Duration:** 4 weeks
9509. Elective – Advocacy and Policy in Obstetrical Care (2 credits):
This course is designed to raise awareness and highlight opportunities to learn about equitable care in maternal health. The course will also focus on discussing policies at a system level and government/state level that dictate maternal health care and evaluate ways to advocate for our patients. The student will be an added member of the clinical team on Labor and Delivery (performing basic obstetrical skills) during the two-week rotation. The student will participate in all aspects of care including triage, management and clinical-decision making of antepartum and labor and delivery patients. Emphasis will be placed on evaluating each patient’s antepartum course and determinants of health through an equity lens. The student will learn the basics of advocacy as a physician by analyzing current system, local, state, and national policies, and will be able to identify opportunities for advocacy. Students will be required to give one brief presentation at the end of the rotation. The presentation will be a literature review of a pertinent policy, law, or bill of their choice that has a direct impact on maternal health care. There will be no travel necessary.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9510. Elective – Acting Internship in Equity and Advocacy in Obstetrics (4 credits):
This course is designed to raise awareness and highlight opportunities to learn about equitable care in maternal health. The course will also focus on discussing policies at a system level and government/state level that dictate maternal health care and evaluate the various ways to advocate for our patients. The student will be an acting intern on the clinical team on Labor and Delivery. The student will participate in all aspects of care including triage, management and clinical-decision making of antepartum and labor and delivery patients. Emphasis will be placed on evaluating each patient’s antepartum course and determinants of health through an equity lens. The students will evaluate a patient’s medical course and identify opportunities for advocacy. The students will be required to give two brief presentations, one at the end of week two and one at the end of the rotation. For the first presentation the student will select a patient encounter and give a presentation about possible healthcare disparities based on social determinants of health and offer more equitable choices of care. The second presentation will be a literature review of a pertinent policy of their choice that has a direct impact on maternal health care. There will no travel necessary.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9511. Elective – Maternal Fetal Medicine (2 credits):
This elective is designed to provide the participating student with exposure to the outpatient high risk obstetrics. The student will evaluate and manage high risk obstetrical patients in the office including conditions of anemia, diabetes mellitus, urinary tract disorders, infectious diseases, asthma, surgical abdomen, and chronic hypertension. In the outpatient setting the student will participate in genetic counseling sessions, ultrasound, and Maternal Fetal Medicine consultations. The student will interact with the Maternal Fetal Medicine attendings, OB residents, genetic counselors and sonographers. There is no call requirement for this rotation.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks
9512. Elective – Delivering Equitable Care in Obstetrics (2 credits):
This course is designed to raise awareness and highlight opportunities to learn about equitable care in
maternal health. The student will learn to define and identify health inequities in maternal care, identify
social determinants of health in obstetrical care, and will learn how to improve the quality of care
delivered to all. The course will also focus on discussing policies at a system level and government/state
level that dictate maternal health care and evaluate the various ways to advocate for our specialty. The
student will be an added member of the clinical team on Labor and Delivery during the two weeks. The
student will participate in all aspects of care including triage, management and clinical decision making
of antepartum and labor and delivery patients. Emphasis will be placed on evaluating each patient’s
antepartum course and determinants of health through an equity lens. The student will learn practical
ways to actively deliver more equitable care. Students will be required to give a brief presentation
based on a patient case of their choosing and discuss healthcare disparities based on social
determinants of health and offer more equitable choices of care. There will be no travel necessary.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9513. Elective – Substance Use Disorder in Pregnancy (2 credits):
This course is an interdisciplinary elective combining Obstetrics and Gynecology and Addiction Medicine,
specifically related to the care of pregnant women with substance use disorder. The elective is designed
to give the student well-rounded exposure to the assessment and treatment of substance use disorder
in the setting of obstetrical care, and exposure to the assessment and treatment of advanced obstetric
pathology complicated by the medical and socioeconomic implications of substance use disorder. The
student is expected to participate directly in all aspects of care including office-based opioid treatment
(OBOT) group sessions, outpatient management of substance use disorder, outpatient prenatal and
postnatal obstetrical care workshops, decision analysis of treatment modalities including but not limited
to physical exam assessment, medical regimens, group-based therapy, and individual psychiatric care,
and amendment of treatment plans. Emphasis will also be placed on the collaborative effort required in
the treatment of substance use disorder in the setting of obstetrics between psychiatry and OB/GYN
healthcare teams. The student will be able to discuss the racial, geographical, and socioeconomic
implications of substance use disorder in obstetrical patients. Attendance and participation in OBOT
group and didactics will also be expected. The student’s hours will match those of the attending with
whom they are scheduled to work. Travel will be involved to Carilion New River Valley Medical Center in
Christiansburg, VA and to Carilion Franklin Memorial Hospital in Rocky Mount, VA.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9910. Elective – Orthopaedics 3rd Year (2 or 4 credits):
To improve understanding of the spectrum of care required for orthopaedic patients and the concept of continuity of care, the hybrid elective in orthopaedics/musculoskeletal (MSK) will include operating room exposure at least one day per week with the goal of an integrated understanding of perioperative assessment, rationale of surgical intervention for a specific subset of patients and orthopaedic issues, surgical anatomy, and post-operative management. Exposure to anesthesia principles and acute care pain management are also components of this elective. The preceptor is an orthopaedic faculty member and the locations are the orthopaedic outpatient facilities and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 or 4 weeks

9911. Elective – Orthopaedics A, Specialty (2 or 4 credits):
This elective is designed for those students considering a career in orthopaedic surgery. It is available from July through December only and priority is given to students who have completed a MS3 orthopaedic elective. It is designed to allow increased exposure to orthopaedic subspecialties and/or one-on-one faculty interaction, if requested and mutually agreeable to student and faculty. Each 2- or 4-week block will have students assigned to a cross section of faculty and with one week of one-on-one faculty interaction, if requested. Students will follow the attending schedule (including on-call when applicable). ALL rotations include a mandatory one-week trauma/fracture service rotation. Students may select a one-week specific subspecialty rotation or they may be assigned to a number of providers to broaden the subspecialty exposure. The option of a one-week rotation will be offered only to students who have done a four-week MS3 orthopaedic elective. The preceptor is an orthopaedic faculty member and the locations are the orthopaedic outpatient facilities, Carilion Roanoke Memorial Hospital, Carilion Roanoke Community Hospital and Roanoke Ambulatory Surgery Center.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9912. Elective – Orthopaedics B, Non-Specialty (2 or 4 credits):
This elective is designed for those students considering a career in specialties that will have clinical overlap with orthopaedics and musculoskeletal care. It is available from November through May and previous orthopaedic elective exposure is not required. It is designed to allow increased exposure to orthopaedic subspecialties and a large number of orthopaedic faculty. Each 2- or 4-week block is divided into rotations with students assigned to a subspecialty for each week when possible. Students will be assigned to faculty and office or operating room on a day-by-day schedule. While there are no mandatory rotations, time on the trauma/fracture service rotation is advised. Students may select specific subspecialty rotation(s) and every effort will be made to honor requests. Rotation selection and
one-week options are dependent on faculty availability and coordination with MS3 rotations. The preceptor is an orthopaedic faculty member and the locations are the orthopaedic outpatient facilities, Carilion Roanoke Memorial Hospital and Carilion Roanoke Community Hospital.

**Prerequisite(s):** Successful completion of Phase I

**Co-requisite(s):** None

**Duration:** 2 or 4 weeks

---

**9913. Elective – Orthopaedics, ER (2 or 4 credits):**

This elective is designed for the student who is interested in primary care or emergency medicine. It is designed to give acute orthopaedic injury exposure to the student who may see this type of injury in the above noted settings. The location is Carilion Roanoke Memorial Hospital.

**Prerequisite(s):** Successful completion of Phase I + 9813, 9819

**Co-requisite(s):** None

**Duration:** 2 or 4 weeks

---

**9914. Elective – Pediatric Orthopaedic Surgery (2 credits):**

This elective will expose students to common pediatric musculoskeletal pathologies including plicas, bone and soft tissue cysts, pes planus (flat foot), developmental dysplasia of the hip, tendon contractures, and more. Students will spend time in the clinic and operating room working alongside a fellowship-trained pediatric orthopaedic surgeon. Students will have an opportunity to strengthen their history taking and physical exam skills, as well as their orthopaedic fund of knowledge. Students will be allowed to attend surgeries with the expectation that they have a strong knowledge of the patient’s history and the procedure they are undergoing. The location is Carilion Roanoke Memorial Hospital.

**Prerequisite(s):** Successful completion of Phases I and II

**Co-requisite(s):** None

**Duration:** 2 weeks

9601. Elective – Pediatric Endocrinology (2 or 4 credits):
This elective will be primarily an outpatient experience, evaluating patients presenting for consultation or follow-up to the Pediatric Endocrinology Clinic. Students may also participate in inpatient consultations when they are available and educationally relevant. Common problems encountered will include type 1 and type 2 diabetes, obesity and the metabolic syndrome, disorders of the thyroid, pituitary, and adrenal glands, and disorders of growth, puberty, and bone/calcium. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9816
Co-requisite(s): None
Duration: 2 or 4 weeks

9602. Elective – Pediatric Cardiology (2 or 4 credits):
The mission of this elective is to provide an in-depth learning experience in the field of non-invasive pediatric cardiology. Emphasis will be placed on outpatient management of children with heart disease. Students will be participating in non-invasive testing for heart disease including electrocardiography (ECG), echocardiography, fetal echocardiography, and stress testing. Students will become familiar with the work-up and management of pediatric patients with murmurs, chest pain, palpitations, and syncope. Students will evaluate patients with suspected cardiovascular abnormalities with special emphasis on the longitudinal management of patients with congenital heart disease. Students will develop clinical skills in cardiac auscultation and interpretation of pediatric ECGs. Students will attend teaching and patient care conferences. The locations are the outpatient clinics and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9816
Co-requisite(s): None
Duration: 2 or 4 weeks
9603. Elective – Pediatric Pulmonary/Allergy (2 or 4 credits):
Students will rotate in the inpatient ward, the pediatric intensive care unit (PICU), the neonatal intensive care unit (NICU), and the outpatient clinics, as well as experience the bronchoscopy lab and pulmonary function testing (PFT) lab. Rotations will include rounding with the physicians in these areas. In some instances, students will examine patients, perform physical examinations, and develop a differential diagnosis and a proposed work-up and treatment plan in both an inpatient and outpatient setting. Goals and curriculum components for this elective will be similar to those of the pediatric residency program. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9816
Co-requisite(s): None
Duration: 2 or 4 weeks

9604. Elective – Pediatric Gastroenterology (2 or 4 credits):
This elective is intended to develop the medical students’ clinical skills and enhance their fund of knowledge in the evaluation and management of inpatient and outpatient gastroenterology (GI), hepatology, and nutrition disorders. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9816
Co-requisite(s): None
Duration: 2 or 4 weeks

9605. Elective – Acting Internship in Pediatrics (4 credits):
This elective will consist of caring for patients on the pediatric inpatient service. The fourth-year medical student will work with the pediatric inpatient team in direct patient care of hospitalized patients on the general pediatric inpatient service. The student will take the history and perform the physical examination at the time of admission. From this information, the student will develop a differential diagnosis, plan the diagnostic evaluation, and design the management of the patient. The student will then take primary responsibility of the patient until they are discharged from the hospital. They will be directly supervised by an upper level (PGY2, PGY3) resident and the pediatric attending physician. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9606. Elective – Community Pediatrics (2 or 4 credits):
The mission of this elective is to provide an in-depth learning experience in the setting of a busy outpatient pediatric clinic. This elective will emphasize preventive and anticipatory care as well as sick office care within the setting of a pediatric medical home. Students will learn about pediatric growth and development, perform and document history and physicals on well and sick children, provide age specific anticipatory guidance for pediatric patients and their families, and manage the care of sick infants and children over serial office visits to promote and understand continuity of care, including the evaluation, diagnosis, and treatment of common acute pediatric diseases. The location is the outpatient clinic.
Prerequisite(s): Successful completion of Phase I + 9816
Co-requisite(s): None
Duration: 2 or 4 weeks
9607. Elective – Developmental Pediatrics (2 credits):
This elective will introduce the medical student to the evaluation and management of special needs children by participation in the Child Development Clinic. The student will share in the patient’s chart review, history taking, and physical examination. From this information, the student will generate a differential diagnosis, plan the diagnostic evaluation, and create a management plan in consultation with the attending physician. The location is the outpatient clinic.
Prerequisite(s): Successful completion of Phase I + 9813, 9815, 9816
Co-requisite(s): None
Duration: 2 weeks

9608. Elective – Genetics and Genetic Testing (2 or 4 credits):
This elective will consist of consulting on patients with known or suspected genetic disorders. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the student will generate a differential diagnosis, plan the diagnostic evaluation, and create a management plan in consultation with the attending physician. The location is the outpatient clinic.
Prerequisite(s): Successful completion of Phase I + 9813, 9815, 9816
Co-requisite(s): None
Duration: 2 or 4 weeks

9610. Elective – Neonatal ICU (2 or 4 credits):
The general objectives of this elective are to obtain a broad understanding of the medical problems afflicting infants during the first month of life and to learn generally applicable principles in the neonatal intensive care unit (NICU) setting. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9611. Elective – Pediatric Hematology/Oncology (2 or 4 credits):
This elective will consist of consulting on patients with hematological and oncological conditions. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the student will develop a differential diagnosis, plan the diagnostic evaluation, and design the management of the patient. The student may observe lumbar punctures and bone marrow tests as scheduled during their rotation. They will also be required to give a 15-minute talk on a topic agreed upon by the attending if on the four-week rotation. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9816
Co-requisite(s): None
Duration: 2 or 4 weeks

9612. Elective – Pediatric ICU (2 credits):
The student will spend the elective time in the intensive care unit (ICU) and will have potential exposure to a wide range of illnesses from multiple organ systems. The student will be expected to develop skills in interacting with critically ill children and also with the parents of these children. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks
9613. Elective – Pediatric Neurology (2 or 4 credits):
This elective will consist of consulting on patients with the pediatric neurologists. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the student will develop a differential diagnosis, plan the diagnostic evaluation, and design the management of the patient. The student will make a presentation to the preceptor if doing the four-week rotation. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9816
Co-requisite(s): None
Duration: 2 or 4 weeks

9614. Elective – Genetics/Pediatric Developmental Disorders (4 credits):
This elective will introduce the medical student to the evaluation and management of special needs children. The elective consists of alternating rotations with the outpatient Child Development Clinic and Pediatric Genetics Clinic, as well as inpatient pediatric genetic consults. The student will do the patient’s chart review, history taking, and physical examination. From this information, the student will generate a differential diagnosis, plan the diagnostic evaluation, and create a management plan.
Prerequisite(s): Successful completion of Phase I + 9813, 9815, 9816
Co-requisite(s): None
Duration: 4 weeks

9615. Elective – Peds: SDOH/Advocacy (2 credits):
This elective highlights experiential learning in the local community by focusing on exposure to agencies who work with the underserved communities with significant health care disparities. Students have clinical time in primary care settings or a hospital-based setting with low socioeconomic patient populations and will learn about social determinants of health and the impact on patients. Field experiences expose them to real life scenarios and the interprofessional approach to management, prevention, and issues related to populations needs. This may include but is not limited to visits to Children’s Trust, the Health Department, free clinics, Department of Social Services, and the Child Health Investment Partnership (CHIP). There will also be time spent with a social worker, on interprofessional rounds, and with a Care Coordinator. The interprofessional nature of care management will be highlighted. This may be varied to provide exposure to broader primary care content and to the interest of students with emphasis on participation and analyses of various systems and their impact on health care and interprofessional management.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

### 9701. Elective – Child and Adolescent Psychiatry- Outpatient (2 or 4 credits):
This elective is based in the Psychiatry Department Outpatient Child and Adolescent Clinic. Students will see children between the ages of 5 and 17 under the close supervision of a child psychiatry fellow and board-certified child psychiatrist. Students will also interact with patient family members and caretakers. Some exposure to liaison with public social service agencies will occur. Problems likely to be encountered in this patient population include mood disorders, behavioral dyscontrol disorders, reactive attachment disorders, attention disorders, and learning disabilities. Students will be able to observe psychotherapy and pharmacotherapy with the pre-adult patient and learn about the importance of family interactions. The location is Carilion Roanoke Memorial Hospital, Rehabilitation Center.

*Prerequisite(s): Successful completion of Phase I + 9817*
*Co-requisite(s): None*
*Duration: 2 or 4 weeks*

### 9702. Elective – Child and Adolescent Psychiatry- Inpatient (2 or 4 credits):
This elective is based in a 12-bed unit taking children and adolescents between the ages of 5 and 17. The student will function as an integral member of the treatment team including a board-certified child psychiatrist, child psychiatry fellow, general psychiatry resident, psychologist, social worker, and nursing staff. The student will participate in rounds and will meet with patients in group and individual settings. Close supervision will be given by the child psychiatry fellow and attending. Problems likely to be encountered in this patient population include mood disorders, substance use disorders, behavioral dyscontrol disorders, reactive attachment disorders, attention disorders, and psychosis. The student will be able to observe psychotherapy and pharmacotherapy with the pre-adult patient and learn about the importance of family interactions. The location is Carilion Roanoke Memorial Hospital, Rehabilitation Center.

*Prerequisite(s): Successful completion of Phase I + 9817*
*Co-requisite(s): None*
*Duration: 2 or 4 weeks*
9703. Elective – Consultation Liaison Psychiatry (2 or 4 credits):
This elective will focus on patients in medical, surgical, and rehabilitation units who are in need of psychiatric care and are seen under the supervision of a board-certified psychosomatic psychiatrist. Ages of this population are 18 and older. Problems likely to be encountered include mood disorders, psychosis, substance use disorders, adjustment to acute medical problems, delirium, and exaggeration of symptoms. The student will accompany a board-certified psychosomatic psychiatrist during the course of providing inpatient consultation. A first- or second-year psychiatry resident may also be involved in the teaching. The student will be able to observe how the psychiatrist can usefully contribute to the care of medically or surgically hospitalized individuals. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9817
Co-requisite(s): None
Duration: 2 or 4 weeks

9704. Elective – Geriatric Psychiatry (2 or 4 credits):
During this elective, the student will participate in a wide spectrum of treatments used for geriatric psychiatry. Most of their time will be spent in an outpatient geriatric medicine and psychiatry clinic with geriatric psychiatry specialists. Some time will be spent going to nursing homes to care for the elderly. Limited exposure to geriatric medical/surgical consultation will occur. Supervision at all venues will be by a board-certified geriatric psychiatrist and to a lesser extent by a geriatric psychiatry fellow. Problems likely to be encountered in this patient population include mood disorders, grief, dementia, end-of-life issues, and adjustment to continuing medical problems. The age range of the patients treated is 65 and older. In addition, the student may opt to spend one day going to geriatric nursing homes with a psychiatrist. The student will be able to observe psychotherapy and pharmacotherapy with the geriatric patient and learn about the the importance of family support, variations in physiology and metabolism in the aging individual, and end-of-life issues. The locations are the outpatient office and nursing homes in the Roanoke Valley.
Prerequisite(s): Successful completion of Phase I + 9817
Co-requisite(s): None
Duration: 2 or 4 weeks

9705. Elective – Acting Internship in Psychiatry (4 credits):
During this elective, the student will work with the assigned attending, resident, and students as an active member of the treatment team on the inpatient psychiatry units. The student will be assigned a maximum of six patients and will be an active team leader on the treatment team under the supervision of the resident and attending physicians. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9706. Elective – Acting Internship in Psychiatry, Catawba (4 credits):
During this elective, the student will work with the assigned attending, resident, and students as an active member of the treatment team on the inpatient psychiatry units at Catawba Hospital. The student will be assigned a maximum of six patients and will be an active team leader on the treatment team under the supervision of the resident and attending physicians.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks
9707. Elective – Inpatient Psychiatry, Catawba (2 credits):
During this elective, the student will work with the assigned attending, resident, and students as an active member of the treatment team on the inpatient psychiatry units at Catawba Hospital. The student will be assigned a maximum of six patients and will be an active team leader on the treatment team under the supervision of the resident and attending physicians.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9708. Elective – Acting Internship in Psychiatry, Veterans Affairs Medical Center (4 credits):
During this elective, the student will work with the assigned attending and resident as an active member of the treatment team on the inpatient psychiatry units. The student will be assigned a maximum of six patients and will be an active team leader on the treatment team under the supervision of the resident and attending physicians. Duties will include leading daily treatment team meetings in discussion of patients, writing notes, making recommendations for the treatment plan, reviewing labs and imaging results, and communicating with consultants. The location is the Veterans Affairs Medical Center.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9709. Elective – Advanced Outpatient Child and Adolescent Psychiatry (2 or 4 credits):
This elective will allow students who have previously completed outpatient child and adolescent psychiatry to experience community psychiatry services offered in the Roanoke Valley in addition to participating in standard outpatient clinics. Students will have the opportunity to work in the community with Carilion providers and experience multiple psychiatric services that are unavailable during the introductory outpatient/inpatient child and adolescent psychiatry rotation. Each student will have the opportunity to customize their learning experience based on individual interests and learning goals. During this rotation, students will be encouraged to take additional responsibility in patient management with emphasis placed on initial diagnosis, pharmacological treatment, and patient disposition following each encounter. At the conclusion of the rotation, students who choose the four-week option are expected to do a 5-10 minute presentation on a topic of personal interest related to child and adolescent psychiatry. Locations include Pediatric Neurodevelopment Clinic, Community Teen Clinic, Intercept Youth Services, and Roanoke City Department of Social Services.
Prerequisite(s): Successful completion of Phases I and II + 9701
Co-requisite(s): None
Duration: 2 or 4 weeks

9711. Elective – Addiction Medicine (4 credits):
The Addiction Medicine elective will guide learners about patients with substance abuse, including pregnant patients and those with comorbid conditions. Students will participate in substance identification and treatment in the Emergency Department and other acute care settings, as well as gain an understanding of long-term substance abuse management and the role of psychosocial influences. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks
9712. Elective – Acting Internship in Child and Adolescent Psychiatry (4 credits):
During the Acting Internship (AI), the student will work with the assigned attending, resident, and students as an active member of the treatment team on the child and adolescent inpatient psychiatry unit. The student will be assigned a maximum of six patients and will be an active team leader on the treatment team under the supervision of the resident and attending physician. The student will perform and document a complete mental status exam, be involved in management plans, assess risk, discuss medicolegal issues, and explain the balance of personal and professional life. Family meetings will be held for crisis stabilization and the student will participate in those meetings. The student will utilize available resources to understand and treat patients and work within an interprofessional and multidisciplinary setting.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks

9801. Elective – Interventional Radiology (2 credits):
This elective will consist of further clinical experience in the subspecialty of interventional radiology to include management of conditions in genitourinary, gastrointestinal, vascular, biliary, neurological, and oncologic interventions in the spectrum of various clinical conditions. Students will be exposed to daily teaching sessions with interventional radiologists and attend multidisciplinary conferences that incorporate patient management issues. The location is Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9818
Co-requisite(s): None
Duration: 2 weeks

9802. Elective – Breast Imaging (2 credits):
This elective will consist of further clinical experience in the subspecialty of breast imaging to include the modalities of screening and diagnostic mammography, ultrasound, and magnetic resonance imaging (MRI) in the imaging diagnosis of benign and malignant diseases of the breast. Students will be exposed to daily teaching sessions and attend multidisciplinary conferences that incorporate patient management issues. The location is the Carilion Breast Care Center.

Prerequisite(s): Successful completion of Phase I + 9818
Co-requisite(s): None
Duration: 2 weeks

9803. Elective – Musculoskeletal Radiology (2 credits):
This elective will consist of further clinical experience in the subspecialty of musculoskeletal radiology to include the modalities of computed tomography (CT), magnetic resonance imaging (MRI), and arthrography in the imaging diagnosis of musculoskeletal diseases. Students will be exposed to daily teaching sessions with radiologists and attend multidisciplinary conferences that incorporate patient management issues. The location is Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9818
Co-requisite(s): None
Duration: 2 weeks

9804. Elective – Neuroradiology (2 credits):
This two-week elective is for the student with an interest in pursuing a residency in the neurosciences or a career in neuroimaging. The intent is to provide an environment that provides the student an opportunity and time to work on a focused project in neuroimaging. This might be a case report, limited research project, preparation of a grand rounds topic, or adding cases to a teaching file or online database. It is required that the interested student meet with the neuroradiologist several months ahead of time to discuss and choose a project so the elective time can be spent most productively. This is especially important if the project involves the use of resources that may not be immediately available.
or involves a cooperative effort with other researchers or technical staff. The location is Carilion Roanoke Memorial Hospital.

**Prerequisite(s):** Successful completion of Phase I + 9818  
**Co-requisite(s):** None  
**Duration:** 2 weeks

**9805. Elective – Advanced Interventional Radiology (2 credits):**
This two-week elective will allow students who have previously completed the interventional radiology elective to learn more advanced aspects of interventional radiology including neurointerventional and oncological interventional radiology. Students will observe and gain knowledge in advanced neurointerventional procedures such as acute stroke, intracranial aneurysms, and arteriovenous malformations (AVM). Students will also observe and gain knowledge in radiofrequency ablation and catheter-directed therapies. The location is Carilion Roanoke Memorial Hospital.

**Prerequisite(s):** Successful completion of Phases I and II + 9801  
**Co-requisite(s):** None  
**Duration:** 2 weeks

**9806. Elective – Acting Internship in Interventional Radiology (4 credits):**
This four-week elective is designed for students applying to residency in interventional radiology. The AI is intended to give the prospective IR applicant an understanding of what a rotation will be like in residency. The focus will be on understanding management and appropriateness of procedures rather than simply being exposed to the types of procedure IR performs. Students will develop procedural skills, including ultrasound guidance with paracentesis, thoracentesis, and vascular access. Students will be expected to perform at least eight jugular venous accesses with ultrasound guidance, five paracenteses, and prepare the list of procedures for rounds each morning. The location is Carilion Roanoke Memorial Hospital.

**Prerequisite(s):** Successful completion of Phases I and II + 9801  
**Co-requisite(s):** None  
**Duration:** 4 weeks

### 9901. Elective – Neurosurgery Spine Track (2 or 4 credits):

Students on this elective will experience about 40% of the week in the Neurosurgery and/or Spine Center Clinic and 60% in the operating room and inpatient floors. Students will gain a deep appreciation for the evaluation and management of degenerative spinal disorders, radiculopathy, myelopathy, spinal column tumors, spinal column fracture, spinal column deformity, chronic spinal pain, scoliosis, and more. Surgical experiences will include the opening and closing of large spinal wounds, pedicle screw...
placement, laminectomy, fusion, kyphoplasty, and more. Students will participate in Tuesday afternoon academic sessions and will always be welcome on rounds and in the operating room. The locations are the Institute for Orthopaedics and Neurosciences and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9819  
Co-requisite(s): None  
Duration: 2 or 4 weeks

9902. Elective – Neurosurgery Pediatrics Track (2 or 4 credits):
In this elective, students will work closely with two pediatric neurosurgery attending surgeons. Students on this rotation will not only learn the nuts and bolts of pediatric neurosurgery but will also gain a deep appreciation for how to relate to critically ill children and their families. This will involve both outpatient clinic work and inpatient evaluations and surgeries. Students will experience patients with disorders such as hydrocephalus, spina bifida, tethered spinal cord, head trauma, spine trauma, brain tumors, non-accidental trauma, chiari malformation, skull masses, craniofacial synostosis and deformity, and more. The pediatric volume of the service is variable, and a healthy mix of adult neurosurgery may be mixed into the rotation. Students will participate in Tuesday afternoon academic sessions and will always be welcome on rounds and in the operating room. The locations are the Institute for Orthopaedics and Neurosciences and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9819  
Co-requisite(s): None  
Duration: 2 or 4 weeks

9903. Elective – Neurosurgery ICU Track (2 or 4 credits):
In this track, students will spend a lot of time in the emergency room evaluating acute neurosurgical issues and interweaving their work with the trauma team. They also will spend time in the intensive care unit (ICU) setting once the acute situation has been initially identified and evaluated. The preceptor is the neurosurgery faculty and the location is Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9819  
Co-requisite(s): None  
Duration: 2 or 4 weeks

9904. Elective – Neurosurgery Operating Room Track (2 or 4 credits):
In this track, students will spend the vast majority of their time in the operating room. They will participate in the daily operating schedule. They will be expected to evaluate the patients and their radiographs in the pre-op area and then discuss the choice and execution of procedures with attending surgeons and residents involved in the procedure. They can anticipate the development of skills in sterile technique, prepping and draping, operative positioning, opening and closing of surgical wounds, control of bleeding, tying, suturing, drain placement, burr hole placement, pedicle screw insertion, laminectomy, ventricular catheter placement, lumbar catheter placement, craniotomy, bone drilling, and more. They will develop an appreciation for the fragility of the nervous system and will develop skills in the delicate manipulation of such tissues. Students will participate in Tuesday afternoon academic sessions and will always be welcome on rounds and in the operating room. The preceptor is the neurosurgery faculty and the location is Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phase I + 9819  
Co-requisite(s): None  
Duration: 2 or 4 weeks
9905. Elective – Neurosurgery Research Track (2 or 4 credits):
Students on the research track work predominately on ongoing projects of the team (although we are open to initiating novel proposed projects). They will still participate in Tuesday afternoon academic sessions and will always be welcome on rounds and in the operating room. Students will work with a faculty mentor and a resident mentor/partner. Skills will be built in study design, literature search, data accumulation, and synthesis. They will share authorship of finished research projects with team members (posters, presentations, papers). The preceptor will be the chosen faculty member/mentor and the location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9819
Co-requisite(s): None
Duration: 2 or 4 weeks

9906. Elective – Neurosurgery Consultation Track (2 or 4 credits):
Students will spend the majority of their rotation evaluating neurosurgery and Spine Center outpatients. They will develop an exceptional acumen in neurological history taking, exam, differential diagnosis, synthesis, and treatment planning. They will learn how to efficiently move a number of patients through a clinic. They will develop patient interaction skills. They will develop a strong background in neuroradiologic evaluation. They will gain an in-depth appreciation for the evaluation and management of spinal disorders and also various brain and peripheral nerve disorders. They will partner with attending neurosurgeons and residents each day. They will independently evaluate each of their patients, review the patient’s studies, and formulate a diagnosis and treatment plan prior to discussing with their neurosurgical partners. Students will be encouraged to follow their patients through their entire neurosurgical experience including inpatient care and surgery. Students will participate in Tuesday afternoon academic sessions and will always be welcome on rounds and in the operating room. The preceptor is the neurosurgery faculty attending and the locations are the Institute for Orthopaedics and Neurosciences and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I + 9819
Co-requisite(s): None
Duration: 2 or 4 weeks

9907. Elective – Acting Internship in Neurosurgery (4 credits):
This track is the most demanding and rigorous offered by the Carilion Clinic Neurosurgery team. In this rotation, the medical student acts essentially as a neurosurgical intern. They are assigned inpatients with whom they care for and follow throughout the patients’ hospitalizations. They will spend a sizable amount of time in the intensive care units (ICUs), on the floors, and in the operating room. They will write regular notes and will interact intimately with patients and their families. They will take neurosurgical call with a resident one in every four nights. They will participate in resident clinic every Tuesday morning. They will gain an appreciation of the full gamut of neurosurgical issues encountered in a busy academic/clinic practice. They will acquire skills in inpatient and outpatient neurosurgical evaluation, the neurologic exam, surgical tissue manipulation, neurological critical care, neuroradiology, patient and family interaction, and much more. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II + neurosurgical elective
Co-requisite(s): None
Duration: 4 weeks
9920. Elective – Anesthesia (2 or 4 credits):
The goal of the elective is to provide the medical student “hands on” exposure to the field of anesthesia and anesthesiology and can be taken by a third- or fourth-year student. The student will work predominantly with anesthesiologists, but may also work with certified registered nurse anesthetists as the month presents itself for scheduling purposes. At the end of the rotation, the student should have a basic understanding of the principles of pre-anesthetic evaluation, preparation, and anesthetic care, including history, physical examination, assessment of physiologic state, categorization of anesthetic risk, and care throughout the perioperative period. The student will have participated with anesthesiologist preceptors in placement of monitors and conduction of anesthetics, including induction, intubation, maintenance, emergence, extubation, and post-anesthetic recovery care. The student may also have opportunities to gain experience in regional anesthesia and sub-specialty anesthesia areas such as pediatric, obstetric, thoracic, cardiac, and neurosurgical anesthesia. The preceptor is the anesthesia faculty and the location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 or 4 weeks

9921. Elective – Advanced Anesthesiology (2 or 4 credits):
The goal of the elective is to provide the medical student “hands on” exposure to the field of anesthesia and anesthesiology and builds upon knowledge of the third year. The student will work predominantly with anesthesiologists, but may also work with certified registered nurse anesthetists as the month presents itself for scheduling purposes. At the end of the rotation, the student should have a basic understanding of the principles of pre-anesthetic evaluation, preparation, and anesthetic care, including history, preceptors in placement of monitors, and conduction of anesthetics, including induction, intubation, maintenance, emergence, extubation and post-anesthetic recovery care. The student may also have opportunities to gain experience in regional anesthesia and sub-specialty anesthesia areas such as pediatric, obstetric, thoracic, cardiac, and neurosurgical anesthesia. The preceptor is the anesthesia faculty and the location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II + 9920
Co-requisite(s): None
Duration: 2 or 4 weeks

9923. Elective – General Surgery/Trauma Night Float (2 credits):
The purpose of this two-week elective is to allow the student to work with the general surgery/trauma services team which handles surgical intervention and perioperative patient care. The student will gain patient care skills and time management skills to offer quality care while managing multiple aspects of patient care. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9924. Elective – Acting Internship in Surgical ICU (4 credits):
During this elective, the student is expected to participate in daily rounds in the intensive care unit (ICU) and function as a sub-intern. The student will present assigned patients on rounds, attend all lectures and conferences, and read required material. The student will also have the opportunity to do procedures under close supervision. There may be night and weekend call, and on-duty hours will follow resident duty hours. Nighttime duties should be expected. The location is Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 4 weeks
9925. Elective – Urology (2 or 4 credits):
This elective will consist of working both in the outpatient and inpatient settings in conjunction with the faculty urologists. In the outpatient setting, the student will do the patient’s chart review, history taking, and physical examination. From this information, the student will develop a differential diagnosis, plan the diagnostic evaluation, and discuss the management with the faculty urologist. In the inpatient setting, the student will be expected to participate in surgical procedures under direct supervision of the faculty physicians. Additionally, the student will have the opportunity to see urologic consults in the inpatient setting. In this case, the student will be expected to do a chart review, obtain the relevant history and data, perform a physical examination, develop a differential diagnosis, and formulate a management plan to discuss with the attending physician. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 or 4 weeks

9927. Elective – Wound Care (2 or 4 credits):
The purpose of this elective is for students to gain familiarity with the causes of chronic wounds, principles of wound healing, and advanced wound management techniques. Students will gain broad exposure to the field of wound care through a busy multidisciplinary wound care service. This should be particularly useful for students interested in any specialty, from primary care to surgical subspecialties. This will be a “hands on” rotation with bedside interventions involved in the care of most patients, as well as involvement in a uniquely interdisciplinary service. The locations are Carilion Clinic Wound Center and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9928. Elective – Breast Surgery (2 credits):
This two-week elective with the breast service managing patients with benign and malignant breast disease allows the student to gain experience in the management of breast disease with a focus on surgical care in a multidisciplinary patient care setting. The second week of the rotation is spent gaining experience on the plastic and reconstructive aspect of breast patient care. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9929. Elective – Acute Care Skills Certificate (2 credits):
This elective consists of intensive training to prepare graduating medical students for their residencies. Over the course of the rotation, students will obtain certification in Advanced Trauma Life Saving (ATLS), Pediatric Advanced Life Saving (PALS), and Fundamental Critical Care Support (FCCS). If time and interest allow, students will also obtain Basic Disaster Life Support (BDLS) training and certification. The location is Carilion Clinic Riverside complex.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks
9930. Elective – Cardiothoracic Surgery (2 or 4 credits):
During this elective, the student will gain experience in operative and perioperative management of
cardiac and thoracic surgical problems. This includes illnesses of the esophagus, motility disorders,
Boerhaave Syndrome, hiatal hernias, reflux disease, infections, benign neoplastic masses, malignancies,
mediastinal masses, lung masses, aortic dissections, and trauma. The student will also learn about
surgical approaches. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9931. Elective – Oral Health (2 credits):
During this elective, the medical students will enhance their diagnostic and clinical skill sets by
participating in inpatient, outpatient, and operating room care. Such care will focus on total patient
management through record review, medical and dental clinical evaluation, and assimilation and
correlation of information leading to differential diagnoses and treatment. The elective will focus on the
clinical application of material learned in years one through three as part of the comprehensive VTCSOM
oral health/oral medicine curriculum. The locations are Carilion Clinic Dental Care and Carilion Roanoke
Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): none
Duration: 2 weeks

9932. Elective – CNRV General Surgery (2 or 4 credits):
During this elective, the student will gain experience in surgery as practiced in a smaller community
hospital setting with a mix of elective and emergent patient care. The student will work with the
community hospital general surgery service handling a broad range of issues. Experience will be gained
in how to care for surgical patients pre-operatively and post-operatively. The student will also learn
when a referral needs to be made to an outside facility such as a level 1 trauma center. The location is
Carilion New River Valley Medical Center.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9933. Elective – Pediatric Otolaryngology/ENT (2 or 4 credits):
This elective will expose students to common head and neck pathologies, including tonsillar and adenoid
hypertrophy, otitis media, hearing loss, and airway complications. Students will spend time in the clinic
and operating room working alongside a fellowship-trained pediatric ENT. Students will have an
opportunity to strengthen their history taking and physical exam skills, in addition to their head and
neck fund of knowledge. Students will be allowed to attend surgeries with the expectation that they
have a strong knowledge of the patient’s history and the procedure they are undergoing. The locations
are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): none
Duration: 2 or 4 weeks

9934. Elective – Acting Internship in Emergency General Surgery (4 credits):
This elective is designed for fourth-year medical students with a strong interest in surgery and who
intend to pursue residency training in surgery. The goal of this elective is to give the students an
opportunity to take an active role on the emergency general surgery team. The students will evaluate
and recognize patients with emergent surgical conditions, synthesize notes, manage orders,
communicate with patients and other healthcare team members, participate in procedures as appropriate to level of training, and see patients in the outpatient setting after emergent surgical care. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

9935. Elective – Colorectal Surgery (2 credits):
The purpose of this 2-week elective is to allow the student an ability to work with general surgeons with interest/expertise in colorectal surgery managing a broad range of problems including neoplasms, diverticulitis, inflammatory bowel disease, and anorectal disorders.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks

9936. Elective – Otolaryngology, Head & Neck Surgery-ENT (2 or 4 credits):
The overall goal of this elective is to provide medical students preliminary exposure to the specialty of otolaryngology, head and neck surgery. This includes an introduction to subspecialties within the field such as otology, neurotology, head and neck surgery, pediatrics, laryngology, allergy, facial plastic and reconstructive surgery, and maxillofacial trauma. The elective will provide medical students with information about the diagnosis and management of disorders of the ear, nose, and throat in an inpatient and outpatient setting. It will also provide exposure to various patient populations with acute and chronic head and neck pathologies. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9937. Elective – Pain Management (2 or 4 credits):
During this elective, students will explore acute, chronic, and cancer-related pain. Working alongside pain specialists, medical students will participate in rounds on inpatient pain consults, outpatient chronic pain management, and perioperative acute/regional pain services. They will develop an understanding of both medical and procedural management to pain, including nerve block techniques and proper opioid prescribing. Emphasis will be placed on interplay between biopsychosocial aspects to pain and the indications for analgesic therapies. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9938. Elective – Surgical Readiness (2 credits):
This elective aims to increase students’ proficiency with surgical skills and techniques in order to increase confidence when entering the intern year. Students will spend time in the Virginia Intercollegiate Anatomy Laboratory (VIAL) at Radford University Carilion and the special projects lab at VTCSOM. Other locations may be utilized as needs arise. Students will have an opportunity to strengthen their suturing and knot-tying skills. The course will be tailored to acquiring requisite surgical skills essential to the specialty that interests the student, such as surgical subspecialties, emergency medicine or family medicine.

Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 weeks
**9939. Elective – Ophthalmology (2 or 4 credits):**
The elective will consist of working in the outpatient setting in conjunction with the faculty ophthalmologist. The medical student will do the patient’s chart review, history taking, and physical examination. From this information, the medical student will develop a differential diagnosis, plan the diagnostic evaluation, and discuss the management with the faculty ophthalmologist. The location is the outpatient clinic.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-requisite(s): None*

*Duration: 2 or 4 weeks*

---

**9941. Elective – Pediatric Surgery (2 or 4 credits):**
This elective will introduce the medical student to common surgical problems seen in the neonate, infant, and younger children. Emphasis will be placed on efficiently working up and treating pyloric stenosis, abdominal pain, necrotizing enterocolitis, intestinal obstruction, and inguinal hernia in this age group. The student will also be introduced to more common congenital problems, including abdominal wall defects, head and neck lesions, thoracic masses, and genitourinary (GU) and gastroenterology (GI) tract anomalies. Common pediatric hematologic and oncologic conditions will also be reviewed. The physiology and nutrition of babies and children will be emphasized as it relates to the surgical care of these patients. Common procedures specific to this age group, such as venous cutdown and airway management, will be covered. The student will gain experience in the surgical management of common and less common pediatric surgical issues. The locations are the outpatient clinic and Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-requisite(s): None*

*Duration: 2 or 4 weeks*

---

**9942. Elective – Plastic Surgery (2 or 4 credits):**
This elective affords students the ability to further their development by being involved in the care of the both elective and emergent patients who are cared for by plastic surgeons. This is both an inpatient and outpatient rotation. The locations are Carilion Clinic Riverside complex and Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-requisite(s): None*

*Duration: 2 or 4 weeks*

---

**9943. Elective – Surgical ICU (2 credits):**
During this elective, the student is expected to participate in daily rounds in the intensive care unit (ICU). The student will present assigned patients on rounds, attend all lectures and conferences, and read required material. The student will also have the opportunity to do procedures under close supervision. There will be night-duty hours and on-duty hours, which will follow resident duty-hour regulations. The location is Carilion Roanoke Memorial Hospital.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-requisite(s): None*

*Duration: 2 weeks*
9944. Elective – Trauma Surgery (2 or 4 credits):
The purpose of this elective is to gain familiarity in initial evaluation of trauma patients, including trauma alerts and consultations and management of post-trauma problems. Activities include attendance and participation in the assessment and resuscitation of acutely injured patients in the emergency room; call (to be arranged); longitudinal management of selected patients through the emergency department, operating room, and intensive care units to recovery; observation of pre-hospital care by accompanying rescue squads on their calls; and selected readings in resuscitation, critical care, and trauma management. The student will participate on the trauma service as a student member of the trauma team. Time for regular attendance at scheduled trauma conferences and individual preceptorial conferences is provided. The locations are Carilion Riverside complex and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9945. Elective – Roanoke Vascular (2 or 4 credits):
During this elective, students will gain experience in diagnosis and surgical management of vascular disease and perioperative patient care. Students will also develop knowledge of anatomy and utilizing surgical techniques to safely operate utilizing the atomic knowledge. Students will learn when to use medical versus surgical intervention. The locations are Jefferson Surgical Clinic and Carilion Roanoke Memorial Hospital.
Prerequisite(s): Successful completion of Phases I and II
Co-requisite(s): None
Duration: 2 or 4 weeks

9946. Elective – Exercises in Critical Thinking in the Clinical Neurosciences (2 credits):
In this case-based course, students will study the pathophysiology, diagnosis, and management of clinical neuroscience entities and then online via a computer, manage patients with representative neurological disorders. Students will apply scientific skepticism to preconceived diagnostic notions and management algorithms surrounding the care of these patients. Online sessions will involve students evaluating and addressing multiple clinical neuroscience and management dilemmas. Cases studied will include the conditions of dementia, severe brain injuries, seizures and epilepsy, sudden onset of severe headache, gait disturbance, hydrocephalus, and spinal cord syndromes. Students will consider multiple outcomes with every step of their diagnostic and management decision-making. Outcome analysis and complication avoidance will be emphasized in this evidence-based medicine approach. Students will be required to write several papers on topics related to the day’s case histories. This is a virtual elective.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 weeks

9947. Elective – Neurological Emergencies (2 credits):
Students will review the evaluation and management of common neurological emergencies. Students will employ neurological principles in their evaluations and interventions. They will review emergent neurological cases including, but not limited to, cerebral herniation syndromes, hydrocephalus, hemorrhagic disorders of the brain, and increased intracranial pressure. Imaging and labs will be reviewed to determine management options. This is a virtual elective.
Prerequisite(s): Successful completion of Phase I
Co-requisite(s): None
Duration: 2 weeks
9948. Elective – Acting Internship in Urology (4 credits):
This elective is designed for fourth-year medical students interested in pursuing a career in urology. The Acting Internship (AI) is intended to give the students an opportunity to take an active role on the urology team and ensure a smooth transition to internship. The rotation emphasizes diagnosis and management of adult and pediatric urological pathology. Students will gain understanding of the focused genitourinary history, examination, and interpretation of urological labs and imaging studies necessary to make thorough diagnoses, assessments, and management plans for patients with urological pathology.

Prerequisite(s): Successful completion of Phases I and II + Urology Elective
Co-requisite(s): None
Duration: 4 weeks
### Away Elective

<tbody>
<tr>
<td>9999</td>
<td>Away Elective</td>
</tr>
</tbody>
</table>

**9999. Elective - Away Elective (2, 4, or 6 credits):**
This elective notates students enrolled in senior away electives at U.S. Liaison Committee on Medical Education (LCME) accredited medical schools and independent academic medical centers that are members of the Council of Teaching Hospitals and Health Systems (COTH).

*Prerequisite(s): Successful completion of Phases I and II + Medical Curriculum Committee Approval*

*Co-prerequisite(s): None*

*Duration: 2, 4, or 6 weeks*

### Independent Study

**9002. Elective – Step 2 Independent Study (2, 4, or 6 credits):**
The focus of this elective is to provide structured study time and educational resources for students who have been required to delay their USMLE Step 2 examination due to not achieving a target practice test score, or for students who have taken and failed the USMLE Step 2 examination. Students will create a structured study plan and will work with the senior dean for academic affairs (or designee) in collaboration with the senior dean for student affairs and appropriate faculty to implement this independent study plan.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-prerequisite(s): None*

*Duration: 2, 4, or 6 weeks*

### Research

<tbody>
<tr>
<td>90RE</td>
<td>MED RES Elective</td>
</tr>
</tbody>
</table>

**90RE. Elective – Research (2 or 4 credits):**
This elective is for the student who will be spending time working on their research project. The student will spend time continuing to learn the principles of research with the mentor in guidance.

*Prerequisite(s): Successful completion of Phases I and II*

*Co-prerequisite(s): None*

*Duration: 2 or 4 weeks*
9984. Elective – Special Studies Elective (2 or 4 credits):
Special Studies courses are designed to be used when a course is being developed or tried for feasibility. Special Studies courses can be created as needed and then a proposal for a permanent course can be submitted through governance. **Prerequisite(s): Successful completion of Phases I and II + Associate Dean for Clinical Science Years 3 and 4 approval**
Co-requisite(s): None
Duration: 2 or 4 weeks
VT/VTC Dual Enrollment Course Descriptions:

Research in Translational Medicine Certificate Program

Year 01 Fall Semester

RTM 5014, Introduction to Biomedical Research (6 credits):
Concepts and elements of biomedical research, including the application of the scientific method, hypothesis generation, the biomedical research continuum (basic, translational, and clinical research), research tools, and biostatistics. Review of medical literature and components of successful interdisciplinary research.

Prerequisite(s): Graduate standing (6H, 6C)

Year 01 Spring Semester

RTM 5024, Translational Science Applications of Biomedical Research (6 credits):
Theory and application of the key concepts and elements of biomedical research, emphasizing the scientific method through the formulation and detailed study of biomedical research questions. Application of biostatistics concepts to an in-depth study of epidemiology and public health. Detailed consideration of biomedical research presentations, primary literature, effective collaboration and scientific misconduct in biomedical research.

Prerequisite(s): 5014 (6H, 6C)

Year 02 Fall Semester

GRAD 5974, Independent Study (6 credits)

Year 02 Spring Semester

GRAD 5904, Project & Report (6 credits)
